

Contents

<i>List of Figures</i>	vii
<i>List of Tables</i>	ix
<i>Preface</i>	xiii
<i>Units Associated with Air Quality Measurements</i>	xv
1 Introduction	1
International Air Quality Programs	3
A Warning About Computer Models	5
2 Primary Gaseous Pollutants and Transport	9
Carbon	9
Sulphur	17
Nitrogen	22
The Meteorology of Long-Range Transport	28
3 Tropospheric and Stratospheric Ozone	33
Tropospheric Ozone	33
The Destruction of Stratospheric Ozone	44
Trends in Global Total Ozone	60
Surface Impacts and Political Decisions	62
4 Atmospheric Aerosols	65
Background Aerosol Concentrations	68
Tropical Aerosols	73
Continental Aerosols in Anthropogenically Affected Areas	74
Light Extinction and Visibility	79
Dry Deposition	82
Possible Impacts on Climate	85
5 Trace Gases and Global Warming	89
The Greenhouse Theory	90
The Culprit Gases	93
Estimates of Greenhouse Impacts	98
Is There Any Evidence for Greenhouse-gas Warming	103
Potential Impacts from Greenhouse-gas Warming	105

vi CONTENTS

6 Rainwater Quality and Acidity	113
An Introduction to Rainwater Chemistry	113
Rainwater Quality at Background Locations	119
Acid Precipitation and Deposition	122
Effects of Acid Deposition on Ecosystems	136
The Need for Cooperative Effort	138
7 The Environmental Consequences of Nuclear War	141
Introduction to Radiation Pollutants	141
The Lessons of Chernobyl	143
Nuclear Winter	147
Environmental Consequences	158
Uncertainties and Recent Developments	161
8 Long Range Transport of Air Pollution	163
Arctic Haze	163
Pollution Transport to the Western North Atlantic	173
Transport of Aeolian Dust	180
9 Air Quality in Urban Atmospheres	187
Waste Heat	189
Primary Pollutants in Urban Atmospheres	191
Photochemical Oxidants	200
Urban Pollution Rankings in the United States	210
10 Conclusions: Looking Towards the 21st Century	213
Improving the Information Base	215
Global Population and the Economic Gap	216
The Need for Sustainable Development	217
Solving Global Environmental Problems	219
<i>Glossary</i>	221
<i>Bibliography</i>	224
<i>Index</i>	249
