

CONTENTS

	<i>Page</i>
<i>Preface</i>	
1. Geology : Scope & Importance	1
2. The Earth-Its Position in Space	4
3. Age of the Earth	12
4. Internal Structure of the Earth	18
5. Atmosphere, Hydrosphere, Lithosphere and their Constituents	27
6. Origin of Atmosphere, Oceans and Continents	36
7. Geological Processes	39
8. Earthquakes	45
9. Tectonic Movements	75
10. Diastrophic Processes-Epeirogeny and Orogeny	89
11. Volcanism	103
12. Isostasy	124
13. Continental-drift	128
14. Island Arcs	140
15. Mid-Oceanic Ridges	146
16. Sea-floor Spreading	152
17. Plate-Tectonics	160
18. Weathering	173
19. Soil and its Conservation	189
20. Mass-Wasting	207
21. Geological Work of Rivers	214
22. Geological Work of Wind	243
23. Geological Work of Underground Water	256
24. Geological Work of Glaciers	266
25. Geological Work of Oceans	296
26. Geological Work of Lakes	315
<i>Bibliography</i>	321
<i>Index</i>	325
