

Contents

1. Introduction to Metal Casting	1-8
1.1 Casting Versus other Processes	1
1.2 Historical Development of Foundry Industry	3
1.3 Operations Involved in Production of Casting	5
1.4 Use of S.I. Units	7
2. Technology of Pattern Making	9-48
2.1 Introduction	9
2.2 Materials for Pattern Making	9
2.3 Types of Patterns	18
2.4 Various Allowances in Patterns and other Technical Considerations	22
2.5 Core Prints	28
2.6 Core Boxes	30
2.7 Some Special Considerations in Design of Patterns	33
2.8 Construction of Patterns and Core Boxes	34
2.9 Finishing of Patterns and Colour Codes	36
2.10 Tools for Making Wood Patterns	36
2.11 Machines for Wood Pattern Making	42
2.12 Instruments for Metal Pattern Making	47
2.13 Metal Pattern Making Machines	47
3. Moulding and Core Materials, Properties and Testing	49-82
3.1 Functional Requirements (Properties) of Moulding Mixtures (Sands)	49
3.2 Type of Moulding Sands	50
3.3 Constituents of Moulding Sands	51
3.4 Testing and Control of Moulding Sands	60
3.5 Moulding Mixtures	72

3.6	Mould Surface Coating	75
3.7	Preparation of Moulding and Core Sand Mixtures	76
3.8	Sand Systems in Foundries	80
3.9	Reclamation of Moulding and Core Sands	80
4.	Moulding and Core Making Processes	83-127
4.1	Introduction	83
4.2	Hand Moulding and Tools Employed	84
4.3	Moulding Boxes or Flasks	86
4.4	Types of Sand Moulding	87
4.5	Moulding Techniques	101
4.6	Cores and Core Making	119
5.	Permanent Mould Casting Processes	128-152
5.1	Gravity Die Casting or Permanent Mould Casting	129
5.2	Pressure Die Casting	131
5.3	Vacuum Die Casting	138
5.4	Low Pressure Die Casting	138
5.5	Centrifugal Casting	139
5.6	Continuous Casting	147
5.7	Semicontinuous Casting	149
5.8	Slush Casting and Cothias Process	149
5.9	Shot Casting	150
5.10	Flush Casting	150
5.11	Squeeze Casting and Liquid Forging	151
6.	Solidification of Metals and Cast Structures	153-190
6.1	Crystallisation from the Melt	154
6.2	Solidification of Alloys	166
6.3	Shrinkage in Solidification	173
6.4	Segregation	179
6.5	Directional and Progressive Solidification	181
6.6	Structure of Castings	182
7.	Flow of Metals and Gating System	191-225
7.1	Flow of Metals	191
7.2	Fluidity of Molten Metals	194
7.3	Pouring Ladles	204
7.4	Gating System of Castings	205
7.5	Design of Gating System	216

8. Riser, Feeding and Castings	226-257
8.1 Considerations for Feeder Head Shape	227
8.2 Considerations for Feeder Head Volume (Size of Riser)	228
8.3 Calculations of Riser Dimensions	229
8.4 Modern Trends in Design of Risers	237
8.5 Feeding Capacity of the Risers	240
8.6 Positioning of Risers	242
8.7 Summary of Riser Design Principles	246
8.8 Types of Risers	246
8.9 Various Aids for Riser Efficiency	250
9. Melting Furnaces	258-280
9.1 Introduction	258
9.2 Cupola	260
9.3 Open Hearth Furnaces	270
9.4 Reverberatory Furnace	271
9.5 Rotary Furnace	273
9.6 Crucible Furnaces	273
9.7 Converters	274
9.8 Electric Furnaces	275
10. Cleaning of Castings	281-287
10.1 Removal of Dry Sand Cores	281
10.2 Removal of Feed Heads and Gates	281
10.3 Removal of Unwanted Projections and Fins	283
10.4 Cleaning and Smoothing of Casting	284
11. Casting Defects, Their Causes and Remedies	288-305
11.1 Faults Arising in Pouring	289
11.2 Inclusions and Sand Defects	289
11.3 Gas Defects	291
11.4 Shrinkage Defects	296
11.5 Contraction Defects	298
11.6 Dimensional Errors	299
11.7 Compositional Errors and Segregation	300
11.8 Significance of Defects	300
11.9 Salvage and Rectification	301
12. Inspection and Quality Control	306-330
12.1 The Cost of In Process Inspection	306
12.2 Sampling Plans for Inspection	307
12.3 Specifications	307

12.4	Quality Aspects	310
12.5	Inspection Procedures	310
12.6	Tests for Detecting Internal Defects	321
13.	Use of Computers in Foundries	331-341
13.1	Introduction	331
13.2	Computer Application in Foundry	333
13.3	Computer Application in Indian Foundries	341
14.	Production of Cast Iron Castings	342-360
14.1	Classification of Cast Irons	344
14.2	Chemical Composition — Effect on Structure and Properties	346
14.3	Types of Graphite	348
14.4	Graphite Size	349
14.5	Metallurgy of Cast Irons	349
14.6	Moulding Practice for Gray Cast Iron Castings	353
14.7	Malleable Irons	353
14.8	Moulding Practice for Malleable Cast Irons	354
14.9	Spheroidal Graphite Cast Iron (SG Iron)	355
14.10	Vermicular Iron	358
15.	Production of Steel Castings	361-372
15.1	Classes of Steel Castings	361
15.2	Specific Characteristics of Castings of Steel	362
15.3	Melting Practice	364
15.4	Moulding Practice	365
15.5	Cleaning and Inspection	368
15.6	Alloying Practice for Steel Castings	370
15.7	Heat Treatment of Steel Castings	371
16.	Foundry Practice for Non-Ferrous Metals and Alloys	373-400
16.1	Production of Aluminium and Alloy Castings	374
16.2	Production of Copper and Alloy Castings	386
16.3	Production of Magnesium and Alloy Castings	393
16.4	Production of Zinc and Alloy Castings	397
17.	Modernisation, Mechanisation and Layout of Foundry	401-412
17.1	Need of Modernisation and Mechanisation	401
17.2	Modernisation of Foundries	402
17.3	Mechanisation of Foundries	403
17.4	Plant Layout for Foundries	412
