<i>Ch.</i>		<i>Page</i>
<i>Preface</i>		v
1 Conversions		1
Electro-mechanical Conversion	1	
Electro-thermal Conversion	13	
Dimensions	23	
2 Electric Fields		26
Capacitance and Permittivity	26	
Electric Field	32	
Electric Force	35	
Voltage Gradient	36	
3 Magnetic Fields		49
Permeance and Permeability	49	
Magnetic Field	51	
Magnetic Circuit	54	
Magnetic Forces	59	
Lifting Power	63	
Induced EMF	65	
Self Inductance	71	
Mutual Inductance	76	
Stored Energy	80	
Iron Losses	83	
4 Electrochemistry and Batteries		86
Electrochemistry	86	
Batteries	92	
5 Resistance and D.C. Circuits		97
Resistance of Conductors and Resistivity	97	

vi CONTENTS

Insulation Resistance	103
Resistance Temperature Coefficient	105
Simple Circuits	112
6 A.C. Circuits	137
Series Circuits	137
Parallel Circuits	159
Series-Parallel Circuits	181
Series Resonance	194
Parallel Resonance	204
Locus Diagrams	207
7 Three-Phase Circuits	216
Star-Connection	216
Delta-connection	235
Star-delta Connection	244
8 Networks	252
Impedance	252
Equivalence of Networks	262
D.C. Networks: General Analysis	265
A.C. Networks: General Analysis	273
Power Transfer and Matcing	281
Transmission Characteristis	283
Constant Impedance Networks	296
Network Theorems	305
9 Alternating Quantities	310
Wave Form Analysis	310
Single-phase Harmonics	336
Three-phase Harmonics	353
10 Transients	362
D.C. Transients R and L	362
D.C. Transients R and C	372
D.C. Transients R, L and C	378
A.C. Transients R and L	387
A.C. Transients R and C	390
A.C. Transients R, L and C	391
