<i>Preface to the Second Edition</i> . . . . .	iii
<i>Preface to the First Edition</i> . . . . .	v
<b>Introduction</b> . . . . .	<b>xi</b>
Purpose of Studies . . . . .	xi
Scope . . . . .	xii
Distribution of Elements . . . . .	xii
Geochemical Affinity . . . . .	xii
Applications . . . . .	xiv
Mineral Deposits . . . . .	xv
Metallic Mineral Deposits . . . . .	xv
Non-Metallic Mineral Deposits . . . . .	xvi
<b>1. Essential Factors in Mineral Deposition and Ore-Genesis . 1 - 10</b>	
1.1. Geological Thermometers . . . . .	1
1.2. Ore-Genesis . . . . .	6
<b>2. Processes of Formation of Mineral Deposits . . . . . 11 - 30</b>	
2.1. Magmatic Concentration . . . . .	11
2.2. Sedimentation . . . . .	13
2.3. Metamorphism . . . . .	14
2.4. Contact Metasomatism . . . . .	15
2.5. Hydrothermal Processes . . . . .	17
1. Cavity Filling . . . . .	19
2. Metasomatic Replacement . . . . .	20
2.6. Oxidation and Supergene Enrichment . . . . .	22
2.7. Sublimation . . . . .	27
2.8. Residual Mechanical Concentration . . . . .	28
<b>3. Mineral Paragenesis and Zoning, Metallogenetic Epochs and Provinces and Controls of Mineral Localisation . . . . 31 - 44</b>	
3.1. Mineral Paragenesis and Zoning . . . . .	31
3.2. Metallogenetic Epochs and Provinces . . . . .	34
3.3. Controls of Mineral Localisation . . . . .	40
<b>3A. Classification of Mineral Deposits . . . . . 45 - 47</b>	
<b>4. Metallic Mineral Deposits . . . . . 48 - 163</b>	
4.1. Precious Metals . . . . .	48
1. Gold . . . . .	48
2. Silver . . . . .	55
3. Platinum . . . . .	57

4.2.	Ferrous and Allied Metals . . . . .	62
	1. Iron . . . . .	62
	2. Manganese . . . . .	68
	3. Chromium . . . . .	75
	4. Vanadium . . . . .	81
	5. Molybdenum . . . . .	83
	6. Tungsten . . . . .	86
	7. Nickel . . . . .	93
	8. Cobalt . . . . .	98
	9. Titanium . . . . .	100
4.3.	Non-Ferrous and Allied Metals . . . . .	104
	1. Copper . . . . .	104
	2. Lead and Zinc . . . . .	109
	3. Tin . . . . .	115
	4. Antimony . . . . .	120
	5. Bismuth . . . . .	123
4.4.	Light Metals . . . . .	125
	1. Lithium . . . . .	125
	2. Magnesium . . . . .	129
	3. Beryllium . . . . .	134
	4. Aluminium . . . . .	137
4.5.	Radioactive Metals . . . . .	146
	1. Uranium and Thorium . . . . .	146
4.6.	Rare Metals . . . . .	150
	1. Tantalum and Columbium . . . . .	150
	2. Cadmium . . . . .	152
	3. Mercury . . . . .	155
	4. Palladium, Selenium and Tellurium . . . . .	156
	5. Rare Earth Group of Metals . . . . .	160
<b>5.</b>	<b>Non-Metallic Minerals . . . . .</b>	<b>164 - 288</b>
5.1.	Mineral Fuels . . . . .	164
	1. Petroleum and Natural Gas . . . . .	164
	2. Coal and Lignite . . . . .	171
5.2.	Gemstones . . . . .	178
	1. Gemstones (General) . . . . .	178
	2. Diamond . . . . .	185
5.3.	Abrasive Minerals . . . . .	191
	1. High Grade Natural Abrasive . . . . .	191
	(a) Industrial Diamond . . . . .	191
	(b) Corundum . . . . .	192
	(c) Emery . . . . .	192
	(d) Garnet . . . . .	193
	2. Siliceous Abrasive . . . . .	194
	(a) Quartz and Abrasive Sand . . . . .	194
	(b) Diatomite . . . . .	194
	(c) Tripoli . . . . .	194
	(d) Pumice and Pumicite . . . . .	194
	(e) Sandstone . . . . .	195

3.	Soft Abrasive . . . . .	195
	(a) Felspar . . . . .	195
	(b) Dolomite . . . . .	195
	(c) Magnesite . . . . .	195
	(d) Dolomite . . . . .	196
	(e) Clays . . . . .	196
	(f) Lime and Limestone . . . . .	196
	(g) Chalk . . . . .	196
	(h) Fuller's Earth . . . . .	196
	(i) Talc . . . . .	196
	(j) Rouge . . . . .	196
5.4.	Building Materials and Dimension Stones . . . . .	197
	1. Granite . . . . .	197
	2. Marble . . . . .	201
	3. Limestone . . . . .	204
	4. Quartzite and Sandstone . . . . .	212
	5. Slate . . . . .	212
	6. Cement . . . . .	213
	7. Clay . . . . .	214
	8. Sand . . . . .	214
	9. Lime . . . . .	214
5.5.	Industrial Minerals . . . . .	215
	1. Mica . . . . .	215
	2. Asbestos . . . . .	222
	3. Barytes . . . . .	224
	4. Talc, Soapstone and Steatite . . . . .	227
	5. Bentonite . . . . .	229
	6. Vermiculite . . . . .	230
5.6.	Metallurgical and Refractory Minerals . . . . .	232
	1. Fireclay . . . . .	232
	2. Graphite . . . . .	233
	3. Dolomite . . . . .	237
	4. Sillimanite Group of Minerals . . . . .	243
	5. Diaspore . . . . .	246
	6. Pyrophyllite . . . . .	247
	7. Quartzite and Quartz-Schist . . . . .	248
	8. Zircon . . . . .	250
5.7.	Ceramic Minerals . . . . .	253
	1. Clay . . . . .	253
	2. Felspar . . . . .	257
	3. Wollastonite . . . . .	258
5.8.	Glass Manufacturing Materials . . . . .	260
	1. Quartz and Silica Sand . . . . .	260
5.9.	Fertilizer Minerals . . . . .	263
	1. Phosphates (Apatite and Phosphorite) . . . . .	263
	2. Potash . . . . .	265

## x Contents

3. Nitrates . . . . .	267
(i) Saltpetre . . . . .	267
(ii) Soda Nitre . . . . .	268
4. Lime . . . . .	268
5. Gypsum . . . . .	269
5.10. Chemical Minerals . . . . .	272
1. Rock Salt . . . . .	272
2. Borax . . . . .	274
3. Fluorite . . . . .	274
4. Sulphur and Pyrites . . . . .	276
5.11. Mineral Pigments . . . . .	279
1. Ochre . . . . .	279
5.12. Mineral Water and Ground Water . . . . .	281
1. Mineral Water . . . . .	281
2. Ground Water . . . . .	284
<i>Map showing important mineral deposits of India . . . . .</i>	<i>after page 288</i>

## Appendices

<i>Appendix I : Identification of Important Economic Minerals based on their Physical Properties . . . . .</i>	<i>289 - 305</i>
<i>Appendix II : Details of Mineral Production from 1995-96 to 1997-98 . . . . .</i>	<i>306 - 308</i>
<b>References . . . . .</b>	<b>309 - 319</b>

## List of Figures

1. **Fig. 2.1.** Zones of oxidation and supergene enrichment.
2. **Fig. 2.2.** Coarse cellular boxwork with typical triangular and quadrangular patterns, correlated with bornite and chalcopyrite. Loc : Mundatikra, Bastar district, M.P.
3. **Fig. 2.3.** Fine cellular boxwork, Also quadrangular pattern with parallel cell walls, correlated with chalcopyrite. Loc : Mundatikra, Bastar district, M.P.
4. **Fig. 2.4.** Cleavage type boxwork with cellular sponge structure, correlated with galena. Loc : Belbathan, Godda district, Bihar.
5. **Fig. 4.1.** Massive Iron ore. Loc : Deposit No. 5, Bailadila, M.P.
6. **Fig. 4.2.** Laminated Iron ore. Loc : Deposit No. 3, Bailadila, M.P.
7. **Fig. 5.1.** Topaz-vein in kyanite rock. Loc : Lapsaburu, Singhbhum district, Bihar.
8. **Fig. 5.2.** Marble hillock. Loc : Darkala (Kankrauli), Rajasthan.
9. **Fig. 5.3.** Kyanite boulders. Loc : Lapsaburu, Singhbhum district, Bihar.
