GENERAL INSTRUCTIONS	1
Pharmacology of Autonomic Nervous System : An overview	5
1. Drugs acting on the heart	11
Exp. 1. To study the effect of cardiac stimulants on frog heart preparation.	12
Exp. 2. To study the effect of cardiac depressants on frog heart.	15
Exp. 3. To determine the nature and site of action of an unknown drug on frog heart	17
2. Drugs acting on smooth muscle (rabbit ileum)	19
Exp. 4. To study the effect of drugs on the motility of isolated rabbit ileum.	21
Exp. 5. To demonstrate stimulant and depressant effects of drugs on rabbit ileum.	23
Exp. 6. To differentiate the effect of a sympomathomimetic from parasympatholytic drug on rabbit ileum.	25
3. Drugs acting on skeletal muscle	27
Exp. 7. To demonstrate the stimulant effect of acetylcholine on an isolated frog rectus muscle and its potentiation by anticholinesterases.	31
Exp. 8. To demonstrate the effect of neuromuscular blocking agent on an isolated frog rectus muscle.	35
4. Drugs acting on the eye	37
5. Drugs used in glaucoma	38
Exp. 9. To study the effect of drugs on (i) the pupil size (ii) the light reflex (iii) the corneal reflex and (iv) the conjunctival blood vessels of rabbit eye.	41
Exp. 10. To measure the intraocular pressure of a rabbit eye using tonometry.	42
6. Local anaesthetics	43
Exp. 11. To demonstrate the effect of surface anaesthetics on rabbit cornea.	45
Exp. 12. To demonstrate the effect of infiltration anaesthesia on rabbit/ guinea pig skin.	47
7. Blood Pressure	49
Exp. 13. To study the effect of drugs on the blood pressure and respiration of dog.	50

CENTRAL NERVOUS SYSTEM

- | | | |
|----|--|----|
| 1. | Hypnotics | 55 |
| | Exp. 14. To study some of the drugs producing sleep and assess their relative potency. | 55 |
| 2. | Antiepileptic drugs | 57 |
| | Exp. 15. To study the anti-convulsant effect of diphenylhydantoin by supra-maximal electroshock seizure test. | 57 |
| | Exp. 16. To study the analgesic activity of narcotic analgesics by contact heat method (Eddy's hot plate method) in mice/rats. | 59 |
| | Exp. 17. To study the analgesic activity of antipyretic analgesics by chemical stimulus (Writhing Test) in mice. | 61 |
| | Exp. 18. To estimate the analgesic activity using an analgesiometer (Tail flick method) in rats. | 63 |

DRUGS AFFECTING URINARY OUTPUT

- | | | |
|----|---|----|
| 1. | Diuretics | 65 |
| | Exp. 19. To estimate the onset, potency, and duration of action of diuretics. | 66 |
