<i>Foreword</i>	iii
<i>Preface</i>	v
<b>Chapter 1 Distinctive Features of Sedimentary Rocks</b>	<b>1</b>
Introduction	1
Field features	1
Petrographic characters	6
Textural and structural features	8
Outcrop patterns and shapes	11
Summary	15
<b>Chapter 2 Textures and Structures of Sedimentary Rocks</b>	<b>16</b>
Introduction	16
Classification	16
Bases of classification	16
Classification of grain sizes	17
Classification of shapes of grains	19
Classification of structures based on disposition of grains, grain sizes and their colour	20
Classification of textures based on shapes of grains	29
Classification of structures based on depth of water in the basin	29
Origin of textures and structures	32
(a) Bedded structures	33
(b) Causes of variation in thicknesses of beds	35
(c) Current/false/cross/torrential bedding structures	35
(d) Graded bedding	36
(e) Spotted structure	36
(f) Some other structures	36
Summary	37

<b>Chapter 3 Petrographical Features of Sedimentary Rocks . . . . .</b>	<b>38</b>
Introduction	38
Classification of minerals composing the sedimentary rocks	40
Classification of sedimentary rocks	41
(a) Classification based on the mineralogical composition	42
(b) Classification based on the character of the sediments	43
(c) Classification based on the chemical composition	44
(d) Classification based on the size and the shapes of grains	45
(e) Classification based on other bases	46
Nomenclature of sedimentary rocks	49
Description of sedimentary rocks	49
(a) Rudaceous group	49
Conglomerate	50
Breccia	56
(b) Arenaceous group	56
Sandstones	57
Graywacke	60
Grit	61
(c) Argillaceous group	61
(d) Calcareous group	62
Limestones	62
Dolomites (dolostones)	64
(e) Oxides and hydroxides group	64
Summary	64
<b>Chapter 4 Processes and Environments of Sedimentation . . . . .</b>	<b>67</b>
Introduction	67
Agents of transportation and the kind of sedimentation	67
Environments of sedimentation	68
Realms of sedimentation	69
Summary	71
<b>Chapter 5 Origin of Sedimentary Rocks . . . . .</b>	<b>73</b>
Introduction	73
Stages in the formation of sedimentary rocks	73
(a) Disintegration and decomposition of crustal rocks	74
(b) Nature of transportation	74
(c) Formation of a basin	75
(d) Deposition of the products of disintegration and decomposition	75
(e) Separation of the products (sediments) brought into the basin	77

(f) Compaction of sediments to form rocks	77
Genesis of the different sedimentary rocks	78
Development of different structures	79
Summary	79
<b>Chapter 6 Importance of Sedimentary Rocks</b>	<b>82</b>
Introduction	82
The academic aspects	82
The economic aspects	83
Summary	84
<b>Chapter 7 Sedimentary Analysis</b>	<b>86</b>
Introduction	86
Characteristics of size and shape of grains in the context of sedimentary analysis	86
Methods of determining grain size	87
(a) The method of sieve analysis	87
(b) The thin section method	88
Necessity of processing grain size data	88
Construction of graphs	88
Construction of frequency distribution curves	90
Size distribution studies	96
Methods of calculating values of grain size parameters	98
Classification of grain size parameters	99
Determination of environments of sedimentation	100
Summary	105
<i>Bibliography</i>	107
