<i>Foreword</i> .....	iii
<i>Preface</i> .....	v
<b>Chapter 1 Role of Field Studies</b> .....	<b>1</b>
Introduction .....	1
Components of geological investigations .....	1
Summary .....	3
<b>Chapter 2 Components of Field Studies</b> .....	<b>4</b>
Introduction .....	4
The first component .....	4
The topographical maps .....	4
The aerial photographs and the satellite imageries .....	5
The second component .....	7
Clinometer compass .....	7
Procedure of measuring the trend of linear elements .....	15
Procedure of measuring the inclination of the planar surfaces .....	18
The role of a pocket lens .....	19
Quartz and felspar .....	21
Ferromagnesian minerals .....	21
The other components (Penknife, dil. HCl, sample bags, camera)....	24
(Figs. 1ab, 2ab, 3ab, 4abc, 5, 6, 7abcde, Photos 1abc, 2ab)	
<b>Chapter 3 Components of Geological Map</b> .....	<b>25</b>
Introduction .....	25
The petrographical (rock) component .....	25
The structural component .....	27
Summary .....	28
(Photo 3)	
<b>Chapter 4 Methods of Geological Mapping</b> .....	<b>29</b>
Introduction .....	29
Some common procedures (First step, Second step) .....	29
Where to look for outcrops .....	32
The reconnaissance survey .....	33
Methodology for the igneous rocks .....	33
Xenoliths and inclusions .....	37
Methodology for the sedimentary rocks .....	39
Nature of mapping technique for the sedimentary rocks .....	39
The role of current and oscillation ripples .....	42
The role of current and graded bedding, and the importance of	
dip direction of beds .....	46
Methodology for the metamorphic rocks .....	47
Summary .....	49
(Figs. 8, 9, 10abc, 11, 12ab, 13abc, 14ab, 15ab, 16ab, 17ab, 18abc,	
and 19abcd, Photo 4)	

<b>Chapter 5 Petrographical field features of rocks</b> .....	<b>50</b>
Introduction .....	50
Igneous rocks .....	50
Non-petrographic field features of igneous rocks .....	53
Summary .....	54
Sedimentary rocks .....	55
Summary .....	56
Metamorphic rocks .....	56
Summary .....	59
General summary .....	60
(Photos 5abc, 6, 7, 8, 9 and Table 1)	
<b>Chapter 6 Structural field features of rocks</b> .....	<b>61</b>
Introduction .....	61
Igneous rocks .....	61
Sedimentary rocks .....	64
Metamorphic rocks .....	64
Structural features common to all rocks .....	67
Joints .....	67
Shears, faults .....	71
Summary .....	73
(Figs. 20abcd, 21 abcd, 22ab, 23 abc, 24, Photos 10 and 11ab)	
<b>Chapter 7 Data to be collected during mapping exercise</b> .....	<b>74</b>
Introduction .....	74
Collection of specimens of rocks .....	74
Collection of petrographic data .....	77
Igneous rocks .....	77
Sedimentary rocks .....	80
Metamorphic rocks .....	81
Collection of structural data .....	81
Introduction .....	81
Planar structures .....	81
Linear structures .....	87
Data for petrofabric studies .....	87
Summary .....	87
(Figs. 25 ab, 26, 27ab, 28ab, 30ab, 31ab, 32 aa, bb <sub>1</sub> and Photos 12, 13, 14, 15)	
<b>Chapter 8 Some field indicators of minerals, rocks and structures</b> .....	<b>89</b>
Introduction .....	89
Indications from geomorphology .....	89
Indications from external appearance of rock .....	90
Indications from texture, colour and structure .....	90
Indications from mineral composition .....	91
Indications for minerals .....	92
Summary .....	92
<b>Chapter 9 Symbols used during geological mapping;</b> <b>Symbols used on topographical maps</b> .....	<b>93</b>
(Figs. 33ab)	
<i>References cited</i> .....	95
