

CONTENTS

Preface

v

1. Fundamental Concepts

1-16

1.1. Routes of Drug Administration

1.1.1 Enteral

1.1.2 Parenteral

1.1.3 Inhalation aerosol

1.1.4 Topical applications

1.2. Drug Absorption and Transport

1.3. Distribution and Excretion of Drugs

1.4. Metabolism of Drugs

1.5. Time course of drug absorption,
distribution and elimination.

1.6. Dose response relationship.

**2. Drugs Acting on the Autonomic
Nervous System**

17-35

2.1. Parasympathomimetics

2.1.1 Acetylcholine

2.2. Cholinesterase resistant cholinergic agents

2.2.1 Bethanechol,

2.2.2 Methacholine

2.2.3 Carbachol

2.2.4 Pilocarpine

- 2.3. Gastro duodenal motility modifiers**
 - 2.3.1 Metochlopramide**
 - 2.3.2 Cisapride**
- 2.4. Anticholinesterases**
 - 2.4.1 Physostigmine**
 - 2.4.2 Neostigmine**
 - 2.4.3 Pyridostigmine**
 - 2.4.4 Organophosphates**
 - 2.4.5 Pyridine 2-aldoxine methylchloride**
- 2.5. Neuromuscular blocking agents**
- 2.6. Parasympathetic antagonists**
 - 2.6.1 Atropine**
 - 2.6.2 Homatropine**
 - 2.6.3 Hyoscine**
 - 2.6.4 Propantheline**
 - 2.6.5 Dicyclomine**
 - 2.6.6 Methantheline, Oxyphenonium, Pipenzolate**
- 2.7. Adrenergic agents**
 - 2.7.1 Adrenaline**
 - 2.7.2 Noradrenaline**
 - 2.7.3 Dopamine**
 - 2.7.4 Dobutamine**
 - 2.7.5 Phenylephrine**
 - 2.7.6 Ephedrine**
 - 2.7.7 Amphetamine**
 - 2.7.8 Metaraminol**
- 2.8. Beta adrenergic agonist**
 - 2.8.1 Salbutamol**
 - 2.8.2 Terbutaline**
 - 2.8.3 Betolterol**
 - 2.8.4 Isoprenaline**

2.9. Xanthine derivatives.

2.9.1 Aminophylline

2.9.2 Choline theophyllinate

3. Drugs Acting on the Cardiovascular System 36-60

3.1 Cardiac Glycosides

3.1.1 Digoxin

3.1.2 Digitoxin

3.2 Other drugs in treatment of CHF.

3.3 Antiarrhythmic Drug

Quinidine; Procainamide, Disopyramide.
Lidocaine, Phenytoin, Propranolol, Bretylium,
Amiodarone

3.4. Antianginal drugs:

Nitrates; Amylnitrite, Glyceryl Trinitrate
Isorbid dinitrate, Pantaerythritol tetranitrate,
Erythrityl tetranitrate.

3.4.1 Mode of action of nitrates.

3.5. Beta adrenergic blocking drugs;

3.6. Calcium Channel blockers :

Varapamil, Nifedipine, Diltiazim, Amlodipine
Felodipine.

3.6.1 Nimodipine

3.7. Diuretics and Antihypertensive agents

3.7.1 Diuretic drugs;

(i) Osmotic diuretics

(ii) Thiazide

(iii) Loop diuretics

(iv) Aldosterone antagonists

(v) Potassium sparing diuretics.

3.8. Beta Blockers

Propranolol, Timolol, Atenolol, Metaprolol,
Betaxol, Labetelol Pindolol.

- 3.9. Centrally acting sympatholytic and antihypertensive agents Clonidine, Methyldopa.
 - 3.10. Post ganglionic adrenergic neuron blockers. Guanethidine.
 - 3.11. Renin angiotensin antagonist Captopril Enalapril, Lisinopril
 - 3.12. Catecholamine depleters : Reserpine
 - 3.13. Alfa-adrenergic blocking agents; Phenoxybenzamine, Phentolamine, Tolazoline
 - 3.14. Arterial and venous vasodilators : Diazoxide, Sodium nitroprusside, Prazosine, Hydralazine,
- 4. Drugs Acting on the Central Nervous System 61-79**
- 4.1. Barbiturates
 - 4.1.1 Classification of Barbiturates
 - 4.1.2 Mechanism of action of Barbiturates
 - 4.1.3 Toxic effects of barbiturates
 - 4.2. Non barbiturates
 - 4.3. Anxiolytics and Tranquillisers
 - 4.4. Antipsychotics
 - 4.5. Antidepressive & Mood elevators
 - 4.6. General anaesthetics
 - 4.6.1 Preanaesthetic medication
 - 4.7. Anti-epileptics
 - 4.8. Drugs used in treatment of Parkinsonism
 - 4.9. Narcotic analgesics
 - 4.9.1 Enkephaline
 - 4.9.2 Morphine
 - 4.9.3 Codeine
 - 4.9.4 Pholcodine
 - 4.9.5 Methadone
 - 4.9.6 Pentazocine

- 4.10. Morphine antagonists
- 4.11. Ethyl Alcohol and drugs used in the treatment of alcoholism
- 4.12. Stimulants of central nervous system.

- 5. Drugs for the treatment of infections and cancer chemotherapy 80-107**
- 5.1. Penicillins and cephalosporins :
Benzyl penicillin, Benzathine penicillin, Phenoxymethyl penicillin
- 5.2. Penicillinase resistant penicillin
- 5.3. Broad spectrum penicillins
- 5.4. Caphalosporins
Cephalexin, cepradine, cefoperazone
- 5.5. Aminoglycoside antibiotics :
Streptomycin, Kanamycin, Gentamicin, Neomycin.
- 5.6. Tetracyclines,
Chlortetracycline, oxytetracycline demeclocycline, doxycycline
- 5.7. Cholaramphenicol, Erythromycin, Roxithromycin, Vancomycin.
- 5.8. Anti fungal drugs :
Amphotericin, Griseofulvin, Nystatin, Ketoconazole.
- 5.9. Antiviral agents :
Idoxuridine, Vidarabine, Acyclovir, Amantadine, Azidothymidine, Anti-HIV agents.
- 5.10. Sulphonamides, Trimethoprim, Sulphamethoxazole
- 5.11. Antitubercular and Antileprotic drugs
- 5.12. Anthelmentcs :
Melendiazole, Piperazine. Thiafendazole levamisol Nirlosamide, Anti-protozoal Drugs.

- 5.13. Antimalarials
Quinine, Chloroquine, Primaquin,
Pyrimethamine, Mefloquin
- 5.14. Antiamebic Drugs
- 5.15. Anticancer Agents
Alkylating Agents, Antimetabolites, Natural
Products, Miscellaneous Anticancer drugs.
- 6. Autacoids and Non Steroidal
anti-Inflammatory drugs 108-118**
 - 6.1. Histamine
 - 6.2. Anti-Histamines
 - 6.3. Serotonin and serotonin antagonists
 - 6.4. Prostaglandins
 - 6.5. Non steroidal Anti-Inflammatory drugs.
Ibuprofen, Naproxen, Ketoprofen, Piroxicam,
Oxyphenbutazone, Phenylbutazone.
 - 6.6. Drugs used in gout;
Colchicine, Indomethacin, Allopurinol,
Probenecid, sulfinpyrazon
 - 6.7. Antipyretic Analgesics
Aspirin, Paracetamol, Ketorolac.
- 7. Drugs Acting on the Digestive System 119-128**
 - 7.1. Drugs Modifying Secretory functions
 - 7.2. Drugs for constipation
 - 7.3. Antidiarrheal drugs
 - 7.4. Gastric Antacids
 - 7.5. H₂ Histamine Receptor Antagonist
- 8. Erythropoetic Drugs and Anticoagulants
and Agents Affecting Blood Cholesterol. 129-137**
 - 8.1. Anemia and its treatment
 - 8.1.1 Iron preparations
Ferrous sulphate, Ferric Ammonium
Citrate, Reduced Iron Iron-dextran
injections.

8.1.2 Pernicious Anemia : vitamin B ₁₂ , Folic acid	
8.2. Anticoagulants.	
8.2.1 Heparin	
8.2.2 Oral anticoagulants.	
8.2.3 Antithrombolytic Agents: Streptokinase, Dipyridamol, Aspirin	
8.3. Drugs used in Hyperlipidemia	
9. Hormones and Related Drugs	138-147
9.1. Glucocorticoids and related drugs	
9.2. Oral contraceptives.	
9.3. Insulin and Oral hypoglycemic drugs	
9.4. Thyroid hormone and Anti thyroid drugs.	
10. Local Anaesthetics	148-150
Classification of Local Anaesthetics	
Mode of Action of Local Anaesthetics	
Induction of Local Anaesthesia	
Individual Local Anaesthetics	
11. Biological Assay	151-153
Methods of Biological Assay	
12. Drug Interactions & Miscellaneous Drug Effects	155-164
12.1. Pharmacodynamic Interactions	
12.2. Pharmacokinetic Interactions and Drug Incompatibility	
12.2.1. Impaired gastro intestinal absorption	
12.2.2. Induction of hepatic drug metabolizing enzymes	
12.2.3. Inhibition of Cellular uptake or binding	

- 12.2.4. Competitive Protein Binding
- 12.2.5. Inhibition of Drug Metabolism
- 12.2.6 Inhibition of Renal Elimination
- 12.3. Adverse Drug Reaction
 - 12.3.1 Therapeutic Toxic Concentration of Some Drugs
 - 12.3.2 Toxic effects of a drug unrelated to its pharmacological actions
- 12.4. Miscellaneous Drug Effects
 - 12.4.1. Drug Allergy
 - 12.4.2. Drug Tolerance
 - 12.4.3. Drug Resistance
 - 12.4.4. Drug Abuse
