
Contents

Preface	v
1. Carbohydrates	1-30
Experiment 1 : Introduction to Carbohydrates	3
Experiment 2 : Some color tests for Carbohydrates	5
Experiment 3 : Production of Ethanol from Sucrose	12
Experiment 4 : Isolation of Lactose from milk	14
Experiment 5 : Determination of Total Lactose in Milk and Milk Powders (Gravimetric method)	16
Experiment 6 : Isolation of Mucic acid from Galactose	19
Experiment 7 : The Chemistry and Isolation of Pectin	21
Experiment 8 : Determination of Gluten in Semolina(suji)	24
Experiment 9 : Isolation of Glycogen from Liver Tissue	26
Experiment 10 : Quantitative Determination of Glucose	28
Experiment 11 : Chemistry and Isolation of Starch from potato	30
2. Lipids	31-51
Experiment 12 : Introduction to lipids	33
Experiment 13 : Tests for lipids	35
Experiment 14 : Determination of Acid Value	37
Experiment 15 : Determination of Saponification Value	39
Experiment 16 : Determination of Iodine Value	41
Experiment 17 : Determination of R M and Polenske Value	44
Experiment 18 : Isolation of Cholesterol from Gallstones	47
Experiment 19 : Some Color test for Cholesterol	49
Experiment 20 : Estimation of Cholesterol	50

3. Proteins	53–68
Experiment 21 : Introduction to Proteins	55
Experiment 22 : Some color reactions for Proteins	57
Experiment 23 : Preparation of Casein from Skimmed milk	60
Experiment 24 : Isolation of Edestin from Hemp seed	62
Experiment 25 : Isolation of Cystine from human hair	63
Experiment 26 : Paper Chromatography of Amino Acids	65
Experiment 27 : Total Protein estimation by Lowry's method	67
4. Enzyme	69-74
Experiment 28 : Determination of optimum temperature for the activity of enzyme, Catechol Oxidase	71
5. Alkaloids	75–117
Experiment 29 : Introduction to Alkaloids	77
Experiment 30 : Some color spot test for detection of Alkaloids	80
Experiment 31 : Test for presence of Ergot in Food grains	82
Experiment 32 : The chromatography of Alkaloids	83
Experiment 33 : The Chemistry and Isolation of Hydrastine from goldenseal	86
Experiment 34 : The Chemistry and Isolation of Berberine	88
Experiment 35 : The Chemistry and Isolation of Nicotine from Tobacco leaves	90
Experiment 36 : Determination of nicotine in tobacco: a non-aqueous acid-base titration	92
Experiment 37 : The Chemistry and isolation of Solasodine from Solanum sps	93
Experiment 38 : The Chemistry and Isolation of Solanine from Potato	94
Experiment 39 : The Chemistry and Isolation of Strychnine from Nux Vomica	96
Experiment 40 : The Chemistry and Isolation of piperine from black pepper	98
Experiment 41 : Hydrolysis of Piperine – Isolation of Piperic Acid	101
Experiment 42 : Determination of Piperine content	102
Experiment 43 : Isolation of Total alkaloids from Vasaka leaves	104
Experiment 44 : The Chemistry and Isolation of Quinine from Cinchona Bark	105
Experiment 45 : The Chemistry and Isolation of Caffeine from Tea	107
Experiment 46 : Some Color Reactions of caffeine	111
Experiment 47 : UV Determination of Caffeine Content in Selected Soft Drinks	113
Experiment 48 : Assay of Belladonna for Hyoscyamine content	115
6. Vitamins	119-137
Experiment 49 : Introduction	121
Experiment 50 : Thiamine(B ₁) as a Coenzyme	126

Experiment 51 : Thiamine assay of Vitamin B Complex tablet	128
Experiment 52 : Determination of Vitamin C content in Fruit Juices or in Commercial Tablets	130
Experiment 53 : Estimation of Vitamin C in Tablet using 2, 6-Dichlorophenolindophenol	134
Experiment 54 : Colorimetric method for estimation of Riboflavin	135
Experiment 55 : Some Color Tests of Some Fat Soluble Vitamins	136
7. Steroids	139-145
Experiment 56 : Some Color test for Steroids	141
Experiment 57 : Isolation of Stigmasterol from Soya bean oil	144
8. Plant Acids	147-151
Experiment 58 : Isolation of Citric acid from lemon	149
Experiment 59 : Determination of Molarity of acetic acid in Vinegar	151
9. Tannins	153-167
Experiment 60 : Introduction	155
Experiment 61 : Some color reactions of Tannins	159
Experiment 62 : Isolation of Tannins from <i>Terminalia chebula</i> (Myrobalan)	161
Experiment 63 : Determination of the Concentration of Polyphenolics in Apples	163
Experiment 64 : Differentiation of Pale Catechu and Black Catechu	167
10. Resins	169-173
Experiment 65 : (i) Preparation of Jalap resin from the crude Jalap powder root (ii) Assay of Jalap	171
Experiment 66 : Some color test for selected Resins	173
11. Gums	175-183
Experiment 67 : Some Chemical Features of Gums	177
Experiment 68 : Identification test for Gums	179
Experiment 69 : The Mucilage swelling factor in Gums	182
Experiment 70 : Determination of total ash and acid insoluble ash value of Gums	183
12. Balsams	185-190
Experiment 71 : Determination of Acid value in Balsam	187
Experiment 72 : Differentiation of Siam and Sumatra Benzoin	189
13. Volatile Oils	191-205
Experiment 73 : Steam Distillation of Peppermint Oil	193
Experiment 74 : Isolation and Characterization of Eugenol (Essence of Cloves)	195
