<i>Preface</i> .....	<i>vii</i>
<i>Acknowledgements</i> .....	<i>ix</i>
<b>1. Basis of 1D-NMR Spectroscopy</b> .....	<b>1–18</b>
1.1 Magnetic Properties of Atomic Nuclei and Old Concept of NMR .....	1
1.2 Nuclear Energy States and the Quantum Concept of NMR .....	3
1.3 Energy of spin states .....	6
1.4 Boltzman Population Excess .....	8
1.5 Resonance .....	10
1.6 Sensitivity Problems in NMR .....	12
<b>Problems</b> .....	<b>17</b>
<b>2. Chemical Shift – Origin and Factors</b> .....	<b>19–62</b>
2.1 Introduction .....	19
2.2 Definition .....	19
2.3 Theory and Measurement of Chemical Shifts .....	20
2.4 Types of shifts .....	25
2.5 Parameters that Affect Chemical Shift .....	26
2.6 Typical Chemical Shifts .....	49
2.7 Chemical shifts for protons of saturated and unsaturated hydrocarbons .....	50
2.8 Chemical Shifts for Aromatic Protons .....	52
2.9 Protons Joined to Oxygen and Nitrogen .....	53
2.10 NMR Shifts of Chemical Classes .....	54
2.11 Chemical Shift Reference and NMR Solvents .....	57
2.12 Preparation of sample solution .....	60
<b>Problems</b> .....	<b>60</b>

<b>3. Spin-Spin Coupling, Spin Notation and Interpretation of <math>^1\text{H}</math> NMR</b> .....	<b>63–137</b>
3.1 Typical NMR Spectrum .....	63
3.2 Number of Signals, Equivalent and Nonequivalent Protons .....	63
3.3 Equivalent or Non-equivalent protons – How to decide? .....	69
3.4 Position of Signals .....	73
3.5 Intensities of Signals .....	73
3.6 Some simple NMR spectra .....	74
3.7 Spin-Spin Splitting (Coupling) .....	78
3.8 The N + 1 Rule .....	89
3.9 Rules for splitting of proton signals .....	94
3.10A First-order spectra .....	95
3.10B Analysis of Two Spin System .....	96
3.11A Second order spectra .....	98
3.11B Magnetic Equivalence and Non-equivalence .....	99
3.12A Chemical Shift: Lanthanide Shift Reagents .....	100
3.12B Spin system nomenclature .....	101
3.13 Second order-spectra becoming first order spectra at higher field strength .....	110
3.13A Chemical Shift : Lanthanide Shift Reagents .....	112
3.13B Chiral Resolving Agents .....	115
3.14 Virtual coupling .....	115
3.15 Analysis of Aromatic Compounds .....	116
3.16 Double Resonance (Spin Decoupling) .....	128
3.17 Deuteration – Deuterium Exchange .....	129
<b>Problems</b> .....	<b>130</b>
<b>4. Coupling Constants and Mechanism of Coupling</b> .....	<b>138–158</b>
4.1 Introduction .....	138
4.2 Factors that affect magnitude of $J$ .....	140
4.3 Mechanism of Coupling .....	152
<b>Problems</b> .....	<b>157</b>
<b>5. Fourier Transform (FT) NMR: Hardware and Software: Data Processing</b> .....	<b>159–173</b>
5.1 The NMR Hardware .....	159
5.2 Instrumentation .....	161
5.3 Continuous Wave (CW) NMR Spectrometers .....	161
5.4 Pulse Fourier Transform NMR Spectrometers .....	163
5.5 Oversampling .....	169
5.6 NMR Data Processing .....	170
5.7 Data Manipulation after Fourier Transformation .....	171
<b>Problems</b> .....	<b>173</b>

<b>6. NOE and Applications .....</b>	<b>174–185</b>
6.1 Nuclear Overhauser Effect (NOE) .....	174
6.2 NOE Difference Spectra .....	181
<b>Problems .....</b>	<b>185</b>
<b>7. Applications of <sup>1</sup>H NMR Spectroscopy including Dynamic Processes .....</b>	<b>186–208</b>
7.1 Introduction .....	186
7.2 Hindered Rotation .....	188
7.3 Rotation About Single Bonds .....	193
7.4 Proton-exchange in Porphyrins .....	195
7.5 Keto-Enol Tautomerism .....	197
7.6 Annomerization .....	198
7.7 Organometallic Chemistry .....	200
7.8 Structure Determination and Proton Exchange of Carbocations .....	202
7.9 Proton-exchange in alcohols .....	202
7.10 Chemical Exchange .....	203
7.11 Exchange in $\sigma$ -Cyclopentadienyl Metal Complexes .....	205
7.12 Exchange in Dimethyl Cadmium, Cd(CH <sub>3</sub> ) <sub>2</sub> .....	205
<b>Problems .....</b>	<b>206</b>
<b>8. Pharmaceutical Applications of <sup>1</sup>H NMR Spectroscopy .....</b>	<b>209–213</b>
8.1 Detection of Impurity in Drugs .....	209
8.2 Investigation of Relative Amounts of Components in a Mixture such as Aspirin and Paracetamol .....	209
8.3 Molecular Mass of an Unknown Compound .....	209
8.4 Determination of the Percentage of Hydrogen .....	210
8.5 Determination of Ethanol content in alcoholic liquor .....	210
8.6 Investigation of Interactions between drug molecules and proteins .....	211
8.7 Complexation of Caffeine with L-tryptophan .....	211
8.8 Assay of Succinylcholine injections .....	212
8.9 Assay of Diphenylhydramine (Benadryl) hydrochloride content in capsule formulation .....	212
<b>Problems .....</b>	<b>213</b>
<b>9. NMR Relaxation, T<sub>1</sub> and T<sub>2</sub> Measurement .....</b>	<b>214–231</b>
9.1 Spins as Vectors .....	214
9.2 Alignment with B <sub>0</sub> and Net Magnetization .....	214
9.3 RF Pulse Creates Coherence among Spin Vectors .....	215
9.4 Rotating Frame of Reference .....	216
9.5 Effect of the RF Pulse: Detecting the Signal .....	220
9.6 Relaxation and Mechanism .....	223
9.7 Factors Affecting T <sub>2</sub> .....	226

## xiv Contents

9.8 $T_1$ vs. $T_2$ .....	226
9.9 Determining $T_1$ by Inversion-Recovery Method .....	228
9.10 Spin-Spin Lattice Time ( $T_2$ ) Measurement .....	229
<b>Problems</b> .....	<b>230</b>
<b>10. Carbon-13 Nuclear Magnetic Resonance</b> .....	<b>232-306</b>
10.1 Sensitivity of C-13 Versus $^1\text{H}$ .....	232
10.2 Equivalent and Non-Equivalent Carbons .....	233
10.3 Typical CMR spectrum .....	236
10.4 Broad-band or Proton-noise decoupling (proton-decoupled spectra) .....	238
10.5 Composite-Pulse Decoupling or Waltz-16 .....	240
10.6 Integrated intensities or peak intensities .....	241
10.7(a) Chemical shift .....	243
10.7(b) Solvents in CMR .....	244
10.8 The correlation chart and chemical shift correlations .....	246
10.9 Chemical shifts of protons and carbon-13: A Comparison .....	250
10.10 Factors affecting chemical shifts of C-13 nuclei .....	253
10.11 $\pi$ -charge density effects .....	253
10.12 Resonance effects .....	253
10.13 Neighbour anisotropy effect and chemical shift anisotropy .....	257
10.14 Isotope effect .....	257
10.15 Hybridisation effects .....	257
10.16 Substituent effects in $^{13}\text{C}$ chemical shift: $\alpha$ , $\beta$ and $\gamma$ effects .....	258
10.17 Steric effect due to induced polarization of C-H .....	260
10.18 Hyperconjugation effects .....	261
10.19 Chemical shifts of chemical classes .....	261
10.20 The off-resonance decoupled spectrum .....	270
10.21 Spin-Spin splitting ( $^{13}\text{C}$ - $^1\text{H}$ coupling constants) .....	273
10.22 Gated decoupling .....	279
10.23 Inverse Gated Decoupling for Quantitative Analysis .....	279
10.24 The Attached Proton Test (APT) for Determination of the Numbers of Attached Protons .....	282
10.25 Distortionless Enhancement by Polarization Transfer (DEPT) .....	288
10.26 DANTE : Selective Excitation of $^1\text{H}$ -Coupled C-13 Resonances .....	294
<b>Problems</b> .....	<b>301</b>
<b>11. C-13 NMR Relaxation: Factors and Mechanisms</b> .....	<b>307-325</b>
11.1 Relaxation Times of C-13 .....	307
11.2 Physical significance of $T_1$ .....	307
11.3 Structural (chemical) significance of relaxation times .....	308
11.4 Factors Affecting C-13 Relaxation Times .....	309

11.5	Relation between $T_1$ and molecular weight .....	309
11.6	Relaxation times versus rigid skeleton (hindered rotation) .....	310
11.7	Relaxation times and preferred axes of rotation .....	312
11.8	Relaxation times and segmental motion .....	312
11.9	Relaxation times and association .....	313
11.10	Relaxation times and complexation .....	313
11.11	C-13 Relaxation Mechanism .....	314
11.12	Dipole-dipole relaxation .....	314
11.13	Spin rotation .....	316
11.14	Quadrupolar relaxation .....	317
11.15	Chemical Shift Anisotropy (CSA) Relaxation .....	318
10.16	The scalar relaxation, $T_{1S}$ .....	319
11.17	Electron-Nuclear Relaxation, $T_{1e}$ .....	319
11.18	Separation of Relaxation Modes from Overall Relaxation Time .....	320
11.19	Deuterium Isotope Effects on Relaxation Times .....	320
11.20	Assignment of C-13 resonance with Relaxation Times, $T_{1s}$ .....	320
11.21	Relaxation Reagents .....	322
11.22	Applications of C-13 NMR Spectroscopy .....	322
	<b>Problems</b> .....	<b>325</b>
<b>12.</b>	<b>Coherence Transfer and INEPT</b> .....	<b>326–332</b>
12.1	INEPT and Spin Operators .....	326
12.2	$^1J_{CH}$ coupling: The cause and utility in magnetization transfer .....	329
12.3	Relaxation-Optimised INEPT Delays .....	332
	<b>Problems</b> .....	<b>332</b>
<b>13.</b>	<b>Two and Three-Dimensional NMR Correlation Spectroscopy</b> .....	<b>333–367</b>
13.1	Two-Dimensional NMR Spectroscopy .....	333
13.2	The Anatomy of a 2D Experiment .....	334
13.3A	2D-HETCOR Spectrum ( $^1H$ - $^{13}C$ COSY) .....	335
13.3B	Anatomy of a HETCOR experiment (creation of a 2D from a 1D experiment) .....	335
13.4	Two-Dimensional COSY or $^1H$ - $^1H$ COSY .....	338
13.5	Cross Peaks: The Fine Structure and $J$ Value .....	341
13.6	Types of COSY Experiments: DQF-COSY and COSY-35 .....	341
13.6B	Total Correlation Spectroscopy (2D TOCSY) .....	343
13.7	NOESY .....	345
13.8	ROESY .....	346
13.9	$J$ Resolved 2D NMR Spectroscopy .....	347
13.10	Inverse Heteronuclear 2D Spectroscopy HSQC, HMQC and HMBC .....	347
13.11	HSQC .....	348
13.12	HMQC .....	351

## xvi Contents

13.13	HMBC .....	352
13.14	Three-Dimensional and Four-Dimensional NMR (Biological NMR) Spectroscopy .....	353
13.15	Constructing a 3D–NMR Experiment from a 2–Dimensional One .....	357
13.16	Types of 3D Experiments .....	357
13.17	RDC and TROSY – the New Techniques for proteins .....	358
	<b>Problems</b> .....	<b>360</b>
<b>14.</b>	<b>NMR Spectroscopy of Some Other Nuclei – <math>^{15}\text{N}</math>, <math>^{19}\text{F}</math>, <math>^{31}\text{P}</math> and <math>\text{D}</math> and <math>^{11}\text{B}</math> .....</b>	<b>368–391</b>
14.1	Introduction .....	368
14.2	N–15 Nuclear Magnetic Resonance .....	368
14.3	Flourine–19 Nuclear Magnetic Resonance .....	371
14.4	Phosphorus–31 NMR Spectroscopy .....	373
14.5	Boron–11 NMR Spectroscopy .....	388
14.6	Deuterium NMR .....	388
	<b>Problems</b> .....	<b>390</b>
<b>15.</b>	<b>Pulsed Gradient Field NMR (PFGNMR) .....</b>	<b>392–394</b>
	<b>Problems</b> .....	<b>394</b>
<b>16.</b>	<b>Magnetic Resonance Imaging (MRI) .....</b>	<b>395–399</b>
16.1	Introduction .....	395
16.2	Working of MRI .....	395
16.3	Applications of MRI .....	399
	<b>Problems</b> .....	<b>399</b>
<b>17.</b>	<b>Infrared Spectroscopy .....</b>	<b>400–480</b>
17.1	Introduction .....	400
17.2	Principle .....	401
17.3	Factors that affect frequency of a vibration .....	409
17.4	Instrumentation .....	410
17.5	Modern Double Beam IR Spectrometer .....	410
17.6	Sample Handling (Preparation of Samples) .....	412
17.7	Fourier Transform InfraRed (FTIR) Spectrometer .....	412
17.7A	Diffuse Reflectance in FTIR .....	415
17.8	Identification of Chemical Classes (Functional Groups) by Infrared Analysis .....	416
17.9	Spurious bands in IR spectra .....	456
17.10	Interpreting an IR spectrum .....	457
17.11	Handy-Dandy Chart for Infrared Spectral Analysis in Laboratory .....	461
17.12	Applications of Infrared Spectroscopy in Pharmaceutical Sciences and Organic Chemistry .....	463
17.13	Infrared Spectromicroscopy : Infrared Spectrum and Forensics (Infrared Microscopy) .....	469

17.14 Two-dimensional FT Infrared Spectroscopy .....	470
<b>Problems</b> .....	471
<b>Multiple Choice Questions for NET, GAIT, GPAT, SLAT, GRE, CSE, HCS etc. Competitive Exams</b> .....	479
<b>18. Mass Spectrometry</b> .....	<b>481–580</b>
18.1 Principle .....	481
18.2 Mass Spectrometer .....	482
18.3 Recognition of Molecular Ion $M^+$ Peak .....	485
18.4 Determination of Precise Molecular Mass .....	488
18.5 Determination of Molecular Formula .....	489
18.6 Double Focussing High Resolution Mass Spectrometers .....	491
18.7 Sample Ionization Methods .....	492
18.8 Electron Impact (EI) Ionisation .....	492
18.9 Chemical Ionisation .....	493
18.10 Field Desorption .....	495
18.11 Fast Atom Bombardment (FAB) .....	495
18.12 Electrospray Ionisation (ESI) .....	497
18.13 Nanospray ionisation .....	499
18.14 Matrix assisted laser desorption ionisation (MALDI) .....	501
18.15 Thermospray Ionisation (TPSI) .....	502
18.16 Types of Mass Analyzers .....	503
18.17 Magnetic Sector Mass Analyzer .....	504
18.18 Time-of-Flight (TOF)/Mass Analyzer .....	504
18.19 Ion-Cyclotron Resonance (ICR) Analyzer .....	505
18.20 Fourier Transform Ion Cyclotron Resonance (FTICR) Analyzer .....	507
18.21A Quadrupole Analyzer (“Mass Filter”) .....	507
18.21B Ion-Trap Analyzer or Quadrupole Ion Storage .....	508
18.22A Ion Detection .....	509
18.22B Data acquisition and processing .....	510
18.23 Tandem Mass Spectrometry (MS/MS) .....	511
18.24 Fragmentation Patterns .....	515
18.25 Parameters that affect fragmentation and governing reaction pathways .....	517
18.26 Sample Volatility (Directed Fragmentation) .....	520
18.27 Mass Fragmentation Patterns of Chemical Classes .....	521
18.28 Mass spectra of some common solvents .....	552
18.29 A Handy-dandy guide to fragmentation pattern for different types of organic compounds .....	554
18.30 Common fragment ions in mass spectroscopy .....	556
18.31 Gas Chromatography–Mass Spectrometry (GC–MS) and 2D spectra .....	561

xviii Contents

18.32 High Performance Liquid Chromatography – Mass Spectrometry (HPLC–MS) .....	565
18.33 Negative Ion Mass Spectrometry and applications .....	567
18.34 Applications of Mass Spectroscopy to Pharmaceutical Sciences .....	568
<b>Problems</b> .....	<b>572</b>
<b>Multiple Choice Questions for NET, SLAT, GAIT, GPAT, CSE, HCS, GRE ETC. Competitive Exams</b> .....	<b>578</b>
<b>19. Ultraviolet Spectrometry</b> .....	<b>581–613</b>
19.1 Principle .....	581
19.2 UV Double Beam Spectrophotometer .....	586
19.3 Sample handling and solvents .....	587
19.4 Important Classes of Chromophores .....	588
19.5 Auxochromes and Shifts .....	589
19.6 The Parameters that Affect Shifts : Conjugation and Solvent Shifts .....	590
19.7 Woodward-Fieser Rules for Dienes .....	594
19.8 Woodward's Rule for Enones .....	596
19.9 Empirical Rules for Carbonyl compounds: $\alpha,\beta$ -Unsaturated Aldehydes, Acids and Esters .....	599
19.10 UV Spectra of Aromatic Compounds .....	599
19.11 A Handy-Dandy Guide to Interpretation of UV Spectra in Lab .....	604
19.12 Some Special Applications of UV Spectroscopy .....	605
19.13 Applications of UV Spectroscopy in Pharmaceutical Sciences .....	607
<b>Problems</b> .....	<b>609</b>
<b>Multiple Choice Question for Competitive Exams—CSIR (UGC), NET, SLAT, GAIT, GPAT, CSE, HCS, GRE etc.</b> .....	<b>612</b>
<b>20. Combined Structural Problems</b> .....	<b>614–639</b>
20.1 Solved Problems .....	614
20.2 Unsolved Problems from various international universities .....	630
20.3 <b>Multiple Choice Questions for NET, SLAT, GAIT, GPAT, GRE, CSE, HCS etc. Competitive Exams</b> .....	<b>637</b>
<b>21. References for NMR, IR, Mass and UV</b> .....	<b>640–646</b>
21.1 Nuclear Magnetic Resonance .....	640
21.2 Mass Spectrometry .....	644
21.3 UV Spectroscopy .....	645
21.4 One Dimensional I.R. ....	646
21.5 2D FTIR Spectroscopy .....	646
<b>Index</b> .....	<b>647–662</b>
