Section 1: COMMUNICATION

List of Scenarios for Communication Stations	1
1. Communication for the MRCPCH Clinical Exams	3
• Communication Station 1: Limited Exercise Tolerance in Hypertrophic Obstructive Cardiomyopathy	6
• Communication Station 2: Atrial Septal Defect Management Planning	9
• Communication Station 3: Supraventricular Tachycardia Associated with Wolff-Parkinson-White Syndrome	13
• Communication Station 4: Resolving Difference in Professional Opinion	17
• Communication Station 5: Eczema Management	21
• Communication Station 6: NGT for Exclusive Enteral Feeding in Crohn's Disease	24
• Communication Station 7: Crohn's Disease—NGT vs Steroids	27
• Communication Station 8: Coeliac Disease In Teenager	30
• Communication Station 9: Upset Parent due to Delay in Initiating Treatment	33
• Communication Station 10: Well Child with Gastroenteritis	37
• Communication Station 11: Vulvovaginitis Management	40
• Communication Station 12: Management of Obesity	43
• Communication Station 13: Circumcision	47
• Communication Station 14: Mild Gastroenteritis Discharge Planning	50
• Communication Station 15: Contraception and Sexually Transmitted Infections	54
• Communication Station 16: Faltering Growth	57
• Communication Station 17: Developmental Dysplasia of the Hip	62
• Communication Station 18: Toddler's Diarrhoea	66
• Communication Station 19: Latent Tuberculosis Management	70

- **Communication Station 20:** Nephrotic Syndrome–Varicella Zoster Immunoprophylaxis 74
- **Communication Station 21:** Paediatric Multisystem Inflammatory Syndrome Temporally Associated with COVID-19 77
- **Communication Station 22:** Need for Blood Sampling from a Child after a Staff Member Suffered Needle Stick Injury 81
- **Communication Station 23:** Prophylaxis for Meningococcal Disease Contact 84
- **Communication Station 24:** Unscheduled Covid Vaccination 89
- **Communication Station 25:** Mentoring and Assessing Progress for a Junior Colleague 93
- **Communication Station 26:** Perceived Delay in Delivery of Baby 96
- **Communication Station 27:** Error in Administration of Medication Correctly Prescribed 99
- **Communication Station 28:** Prescribing Delay and Altering the Prescription 102
- **Communication Station 29:** Senior Colleague Attending Work Under the Influence of Drugs or Alcohol 105
- **Communication Station 30:** Need for Blood Transfusion in Jehovah's Witnesses 108
- **Communication Station 31:** Drug Error 112
- **Communication Station 32:** Fraser Competence in a Young Person Presenting with Deliberate Self Harm 116
- **Communication Station 33:** Fraser Competence in a Young Person with Evolving Eating Disorder 120
- **Communication Station 34:** Obstetrics Fracture 124
- **Communication Station 35:** Error in Administration of Expressed Breast Milk 127
- **Communication Station 36:** Formula Feed Wrongly Given 130
- **Communication Station 37:** Exchange Transfusion for ABO-Incompatibility 133
- **Communication Scenario 38:** Use of Donor Expressed Breast Milk after an Episode of Necrotising Enterocolitis 137
- **Communication Station 39:** Neonatal Antibiotics Planning 141
- **Communication Station 40:** Retinopathy of Prematurity Discussion 144
- **Communication Station 41:** Preterm Labour Counselling 148
- **Communication Station 42:** Social Embarrassment Caused by Feeding Formula Milk 152
- **Communication Station 43:** Cleft Lip and Palate 156

- **Communication Station 44:** Transfer to Paediatric Nephrology Centre for Managing Haemolytic Uraemic Syndrome 162
- **Communication Station 45:** Relapse of Nephrotic Syndrome – Need for Starting Steroids 166
- **Communication Station 46:** Explaining Rationale for ADHD Diagnosis 170
- **Communication Station 47:** Head Injury Management 173
- **Communication Station 48:** Poor Adherence to Anti-Epileptic Medication 176
- **Communication Station 49:** Epilepsy Lifestyle Modifications 179
- **Communication Station 50:** Screening for Suspected Neurofibromatosis Type 1 182
- **Communication Station 51:** Febrile Neutropenia Management 185
- **Communication Station 52:** Breaking Bad News 188
- **Communication Station 53:** Blood Transfusion Causing Delay in Discharge 191
- **Communication Scenario 54:** Speaking to a Young Person with Leukaemia 194
- **Communication Station 55:** Laryngomalacia Management and Addressing Parental Expectations 198
- **Communication Station 56:** Sail Sign in Chest X-Ray 202
- **Communication Station 57:** Bronchial Asthma Management 205
- **Communication Station 58:** Starting Intravenous Antibiotics in Pneumonia 208
- **Communication Station 59:** Explaining Diagnosis of Tuberculosis and Management 211
- **Communication Station 60:** Child Safeguarding Concern 215
- **Communication Station 61:** Rib Fracture with Bronchiolitis 218
- **Communication Station 62:** Child Presenting with a Scald Injury 222
- **Communication Station 63:** Intussusception and Surgical Transfer 226
- **Communication Station 64:** Supporting and Educating a New Trainee 230
- **Communication Station 65:** Febrile Convulsion 233
- **Communication Station 66:** Discussion About Importance of Chaperone 236
- **Communication Station 67:** Audit vs Research 239
- **Communication Station 68:** Discussing Evidence Based Medical Practice 243
- **Communication Station 69:** Withdrawal of Life Support 247
- **Communication Station 70:** Purpuric Rash Management 250
- **Communication Station 71:** Dengue Fever with Low Platelets 253

- **Communication Station 72:** Autistic Spectrum Disorder Associated with Sensory Processing Disorder 257
- **Communication Station 73:** Edward Syndrome 260
- **Communication Station 74:** Explaining ADHD Diagnosis 265
- **Communication Scenario 75:** Juvenile Myoclonic Epilepsy 269

Section 2: DEVELOPMENT

List of Scenarios for Development Stations273

2. Development Assessment for the MRCPCH Clinical Exams275

- **Development Station 1:** Gross Motor Assessment in a 4-Year-Old Child with Spastic Diplegia 279
- **Development Station 2:** Fine Motor Assessment in an 8-Year-Old Child with Hemiparesis 285
- **Development Station 3:** Speech and Language Assessment in a 3-Year-Old Child with Down Syndrome 291
- **Development Station 4:** Speech and Language Assessment in a 4-Year-Old Child with Autistic Spectrum Disorder 296
- **Development Station 5:** Functional Vision Assessment in 4-Year-Old Child with Unilateral Congenital Cataract 301
- **Development Station 6:** Play/Pretend Play and Attention Span: Assessment in a 7-year-old Child with Attention Deficit Hyperactive Disorder 306
- **Appendix 1:** Schedule of Normal Developmental Milestones at a Glance 311
- **Appendix 2:** ADHD 313
- **Appendix 3:** Autistic Spectrum Disorder 314
- **Appendix 4:** Cerebral Palsy 315
- **Appendix 5:** Down Syndrome (Trisomy 21) 318
- **Appendix 6:** Hearing Assessment 319
- **Appendix 7:** Visual Assessment 320

Section 3: HISTORY

List of Scenarios for History Stations323

3. History Taking and Management Planning for the MRCPCH Clinical Exams325

- **History Taking and Management Planning 1:** Sudden Collapse–suspected Cardiac Aetiology 329

- History Taking and Management Planning 2: Reflex Anoxic Seizure Management 333
- History Taking and Management Planning 3: Recognition of DKA and Understanding of Sick Day Rules 336
- History Taking and Management Planning 4: Previously Undiagnosed Adrenal Insufficiency in Patient with Coeliac Disease, Presenting in Adrenal Crisis 340
- History Taking and Management Planning 5: Coeliac Disease Presenting with New Onset Hyperthyroidism 345
- History Taking and Management Planning 6: Suspected Diagnosis of Adrenal Crisis in a known Patient with Crohn's Disease 349
- History Taking and Management Planning 7: Training of Staff for Stoma Management in the School Environment 353
- History Taking and Management Planning 8: Coeliac Disease, Recent Poor Adherence to Gluten-free Diet due to Financial Constraints and Psychosocial Difficulties 357
- History Taking and Management Planning 9: Constipation with Overflow Diarrhoea 361
- History Taking and Management Planning 10: Abdominal Pain-related Functional Gastrointestinal Disorder 364
- History Taking and Management Planning 11: Costochondritis-related Chest Pain 368
- History Taking and Management Planning 12: Egg Anaphylaxis, Long-term Management 372
- History Taking and Management Planning 13: Familial Large Head 375
- History Taking and Management Planning 14: Young Mother with Feeding Issues in an Infant 379
- History Taking and Management Planning 15: Chronic Fatigue Syndrome in a Young Person 383
- History Taking and Management Planning 16: Likely Diagnosis of Long COVID Syndrome 387
- History Taking and Management Planning 17: Fanconi Anaemia with Bruises and Faltering Growth 392
- History Taking and Management Planning 18: Low Levels of Immunoglobulins (IgA, IgM) in Child and Maternal History of Chronic Variable Immunodeficiency 397
- History Taking and Management Planning 19: Septic Arthritis of Right Hip 402
- History Taking and Management Planning 20: Tic Disorder due to Stress, Bullying, Parental Divorce Proceedings 407

- History Taking and Management Planning 21: Suspected Eating Disorder 410
 - History Taking and Management Planning 22: Likely Diagnosis of Medium Chain Acyl-Coa Dehydrogenase Deficiency 413
 - History Taking and Management Planning 23: Suspected Subglottic Stenosis in a Premature Neonate 417
 - History Taking and Management Planning 24: Sub-acute Bacterial Peritonitis in Child with Frequently Relapsing Steroid Sensitive Nephrotic Syndrome 421
 - History Taking and Management Planning 25: Suspected Malfunctioning of Ventriculoperitoneal Shunt 425
 - History Taking and Management Planning 26: Hemiplegic Migraine 430
 - History Taking and Management Planning 27: Poorly Controlled Epilepsy Secondary to Psychosocial Issues 433
 - History Taking and Management Planning 28: Child with Dyspraxia Presenting with Clumsiness 438
 - History Taking and Management Planning 29: Focal Onset Right Sided Seizures with Secondary Generalisation 442
 - History Taking and Management Planning 30: Likely Diagnosis of Juvenile Myoclonic Epilepsy 447
 - History Taking and Management Planning 31: Likely Diagnosis of Nocturnal frontal Lobe Epilepsy 452
 - History Taking and Management Planning 32: Suspected Intracranial Space-Occupying Lesion in a Young Person with Preexisting Health Problems 457
 - History Taking and Management Planning 33: Probable Intracranial Space Occupying Lesion Presenting with Headaches 461
 - History Taking and Management Planning 34: Poorly Controlled Asthma in a Young Person 466
 - History Taking and Management Planning 35: Child Presenting with Cystic Fibrosis Related Diabetes 469
 - History Taking and Management Planning 36: Possible Respiratory Infective Episode in a Child with Cystic Fibrosis 473
 - History Taking and Management Planning 37: Suspected Systemic Lupus Erythematosus 477
