

# Unconventional Machining Processes

Fundamental Principles and Recent Developments

has been written for students of both undergraduate and postgraduate in the disciplines of mechanical, industrial, and production engineering. The book explains the essential concepts of the most recent developments in the field of advanced machining through high-quality illustrations. It comprises 12 chapters and index accompanied by summary, acronyms, and questions for better understanding.

### *Salient features*

- Easy to understand language
- Covers the syllabi of all universities
- Tailored to explain in detail the current trends, and recent improvements in different processes
- Unique tables and figures detailing the material properties, and machining processes
- Questions at the end of each chapter, keeping in mind the trends in several universities for practice

**Janakarajan Ramkumar** PhD is Professor, Department of Mechanical Engineering and Design, Indian Institute of Technology, Kanpur. He is an INAE fellow. His areas of interest are micro- and nano-manufacturing, sustainable and cheap products, and process development. Prof Ramkumar reviews more than 20 journals, has over 80 patents, and more than 250 publications to his credit. He has been a consultant for several projects under DRDO, DST, BIRAC, HAL, and others. He has used over ₹25 crores to create technologies at IIT, Kanpur, and done over 150 seminars on NPTEL, MOOCs, and FDPs to inspire Indian students to pursue research.

**Vyom Sharma** PhD is Project Engineer, Department of Mechanical Engineering and Design, Indian Institute of Technology, Kanpur. He received his MTech-PhD joint degree in 2021, from IIT, Kanpur. His research interests include development of hybrid machining processes, electrochemical dissolution-based micromachining systems, surface texturing techniques, and unconventional methods for the fabrication of acoustic metamaterials. He has published 12 research and review articles in international peer-reviewed journals, and five book chapters. He has also presented his research at 11 international conferences and has one Indian patent to his credit. He is also a reviewer of eight international peer-reviewed journals.

**Mahavir Singh** PhD is Senior Project Engineer, Department of Mechanical Engineering, IIT, Kanpur. He received MTech-PhD joint degree in Mechanical Engineering from Indian Institute of Technology, Kanpur, in 2021. His research interests include advanced micromachining processes, electrical discharge micromachining, wire electrical discharge micromachining, hybrid manufacturing, micro texturing, and tribology. He has nine publications in international journals, one patent filed, and eight chapters in edited books to his credit. He received the Best Paper award at AIMTDR and COPEN conferences. He is a reviewer of three international journals from Taylor & Francis and SAGE publications.

**Amandeep Singh** PhD is Research Establishment Officer, Department of Mechanical Engineering and Design, Indian Institute of Technology, Kanpur. He manages imagineering laboratory, which focuses on novel product creation and services. He completed his doctorate in 2017 from IIT, Kanpur, and has over 20 years of industrial and academic experience. He has multiple patents and published works in international journals; and also mentored various start-ups. He has created 10 MOOCs on NPTEL, and agMOOC.

<i>Foreword</i> by Prof Vinay Kumar Pathak	<i>vi</i>
<i>Foreword</i> by Prof Uday S Dixit	<i>vii</i>
<i>Foreword</i> by Prof Rupinder Singh	<i>viii</i>
<i>Preface</i>	<i>ix</i>
<b>Introduction</b>	<b>1–9</b>
<b>1. Abrasive Jet Machining</b>	<b>11–16</b>
<b>Abstract</b>	11
<b>1.1 Introduction</b>	11
<b>1.2 Working Principle</b>	11
<b>1.3 Description of AJM Setup</b>	12
1.3.1 Gas propulsion system	12
1.3.2 Abrasive feeder	12
1.3.3 Machining chamber	12
1.3.4 AJM nozzle	12
1.3.5 Abrasives	13
<b>1.4 Parametric Analysis</b>	13
<b>1.5 Process Capabilities and Applications</b>	14
<b>1.6 Advantages and Disadvantages</b>	14
<i>Summary</i>	15
<i>Acronyms</i>	15
<i>Practice Questions</i>	15
<i>References</i>	16
<b>2. Water Jet Machining</b>	<b>17–21</b>
<b>Abstract</b>	17
<b>2.1 Introduction</b>	17
<b>2.2 Working Principle</b>	17
<b>2.3 Description of WJM Setup</b>	17
<b>2.4 Process Characterization and Performance</b>	19
<b>2.5 Process Capabilities and Applications</b>	19
2.5.1 Advantages	19
2.5.2 Disadvantages	20
2.5.3 Applications	20
<i>Summary</i>	20
<i>Acronyms</i>	20
<i>Practice Questions</i>	21
<i>References</i>	21

<b>3. Abrasive Water Jet Machining</b>	<b>22–27</b>
<b>Abstract</b>	22
<b>3.1 Introduction</b>	22
<b>3.2 Working Principle</b>	22
<b>3.3 Description of AWJM Setup</b>	23
<b>3.4 Process Characterization and Performance</b>	24
<b>3.5 Process capabilities and Applications</b>	25
<b>3.6 Advantages and Disadvantages</b>	26
<i>Summary</i>	26
<i>Acronyms</i>	26
<i>Practice Questions</i>	26
<i>References</i>	27
<b>4. Ultrasonic Machining</b>	<b>28–38</b>
<b>Abstract</b>	28
<b>4.1 Introduction</b>	28
<b>4.2 Working Principle</b>	28
<b>4.3 Description of USM Setup</b>	29
<b>4.4 Mechanics of Cutting in USM</b>	34
<b>4.5 Parametric Analysis</b>	35
<b>4.6 Process Capabilities and Applications</b>	35
<b>4.7 Advantages and Disadvantages</b>	36
<i>Summary</i>	36
<i>Acronyms and Symbols</i>	36
<i>Practice Questions</i>	37
<i>References</i>	37
<b>5. Electrical Discharge Machining</b>	<b>39–63</b>
<b>Abstract</b>	39
<b>5.1 Introduction</b>	39
5.1.1 Brief historical background of the EDM process	41
<b>5.2 Fundamentals of the EDM Process</b>	41
5.2.1 Pre-breakdown phase	41
5.2.2 Phase of discharge	42
5.2.3 Interval phase	43
<b>5.3 Spark Energy Distribution</b>	43
<b>5.4 Discharge Classifications</b>	43
<b>5.5 Constituent Elements of the EDM Process</b>	44
5.5.1 Workpiece electrode	45
5.5.2 Tool electrode	45
5.5.3 Dielectric fluid	45
5.5.4 Power generators	46
5.5.5 Servo-system	46
<b>5.6 Electrodes Polarity in the EDM Process</b>	46
<b>5.7 EDM: Process Parameters and Output Responses</b>	47

<b>5.8 Analysis of Power Generators</b>	50
5.8.1 R-C circuits	50
5.8.2 Transistor circuits	53
<b>5.9 Process Variants of the EDM</b>	53
5.9.1 Die-sinking EDM	54
5.9.2 Electrical discharge-drilling (ED-drilling)	54
5.9.3 Electrical discharge-milling (ED-milling)	55
5.9.4 Wire-electrical discharge machining (Wire-EDM)	55
<b>5.10 Electrical Discharge Micromachining (EDMM)</b>	56
<b>5.11 Advancements Towards Performance Enhancement</b>	57
<b>5.12 EDM Machined Surface Investigation</b>	58
<b>5.13 Applications</b>	59
<b>5.14 Advantages and Limitations</b>	60
5.14.1. Advantages	60
5.14.2. Limitations	60
<i>Summary</i>	60
<i>Acronyms and Symbols</i>	61
<i>Practice Questions</i>	61
<i>References</i>	62
<b>6. Laser Beam Machining</b>	<b>64–83</b>
<b>Abstract</b>	64
<b>6.1 Introduction</b>	64
6.1.1 Properties of laser beam	64
<b>6.2 Principle of LBM</b>	65
6.2.1 Population inversion	66
<b>6.3 Components of the LBM System</b>	66
<b>6.4 Types of Lasers</b>	67
6.4.1 Solid-state laser	67
6.4.2 Gas laser	67
6.4.3 Semiconductor laser	67
6.4.4 Liquid dye lasers	68
<b>6.5 Laser-material Interaction</b>	68
6.5.1 Heat conduction	69
6.5.2 Melting	70
6.5.3 Vaporization	70
6.5.4 Laser ablation	70
6.5.5 Plasma formation	71
6.5.6 Chemical-based LBM	72
<b>6.6. Material Removal Rate in LBM</b>	73
<b>6.7. Laser Machining Techniques</b>	74
6.7.1 Direct writing method	74
6.7.2 Mask projection method	74
<b>6.8 Beam Intensity Distribution</b>	75

- 6.9 Focusing of the Laser Beam** 75
- 6.10 Gas-assisted Laser Machining** 75
- 6.11 LBM: Mode of Operation** 76
- 6.12 LBM: Applications** 77
  - 6.12.1 Laser drilling 77
  - 6.12.2 Laser cutting 78
  - 6.12.3 Laser texturing 78
  - 6.12.4 Laser-assisted conventional machining 78
  - 6.12.5 Miscellaneous applications 79
- 6.13. LBM: Advantages** 80
- 6.14. LBM: Limitations** 80

*Summary* 81  
*Acronyms and Symbols* 81  
*Practice Questions* 82  
*References* 82

**7. Plasma Arc Machining** **84–94**

- Abstract** 84
- 7.1 Introduction** 84
  - 7.2 Principle of Plasma Generation** 84
    - 7.2.1 Working mechanism of PAM 85
  - 7.3 Components of the PAM** 86
  - 7.4 Modes of PAM** 86
    - 7.4.1 Non-transferred arc system 86
    - 7.4.2 Transferred arc system 87
  - 7.5 Process Parameters and Output Responses** 88
  - 7.6 Gas Selection in PAM** 88
  - 7.7 Various PAM Processes** 89
  - 7.8 Capabilities of PAM** 90
  - 7.9 PAM: Applications** 92
  - 7.10 PAM: Advantages** 92
  - 7.11 PAM: Limitations** 92

*Summary* 92  
*Acronyms and Symbols* 92  
*Practice Questions* 93  
*References* 93

**8. Electron Beam Machining** **95–104**

- Abstract** 95
- 8.1 Introduction** 95
  - 8.2 Principle of EBM** 96
  - 8.3 Components of the EBM** 98
    - 8.3.1 Electron gun 99
    - 8.3.2 Magnetic lens 99
    - 8.3.3 Deflection coil 99

8.3.4 Vacuum chamber	99
8.3.5 On-site visualization equipment	99
8.3.6 Control panel	100
<b>8.4 Process parameters and Output Responses</b>	<b>100</b>
<b>8.5 Analysis of Erosion Depth Per Pulse</b>	<b>101</b>
<b>8.6 Process Capabilities</b>	<b>101</b>
<b>8.7 EBM: Applications</b>	<b>102</b>
<b>8.8 EBM: Advantages</b>	<b>102</b>
<b>8.9 EBM: Limitations</b>	<b>102</b>
<i>Summary</i>	103
<i>Acronyms and Symbols</i>	103
<i>Practice Questions</i>	103
<i>References</i>	104
<b>9. Ion Beam Machining</b>	<b>105–114</b>
<b>Abstract</b>	<b>105</b>
<b>9.1 Introduction</b>	<b>105</b>
<b>9.2 Working Principle of IBM</b>	<b>105</b>
9.2.1 Mechanism of ion-atom collision	107
<b>9.3 Components of IBMg Process</b>	<b>108</b>
<b>9.4 Comparison of IBM with the Other Thermal Machining Processes</b>	<b>109</b>
<b>9.5 Rate of Material Removal in IBM</b>	<b>110</b>
<b>9.6 IBM: Applications</b>	<b>111</b>
9.6.1 Polishing	111
9.6.2 Texturing	111
9.6.3 Cleaning	112
9.6.4 Milling	112
<b>9.7 IBM: Advantages</b>	<b>112</b>
<b>9.8 IBM: Limitations</b>	<b>112</b>
<i>Summary</i>	112
<i>Acronyms</i>	113
<i>Practice Questions</i>	113
<i>References..</i>	113
<b>10. Electrochemical Machining</b>	<b>115–138</b>
<b>Abstract</b>	<b>115</b>
<b>10.1 Introduction</b>	<b>115</b>
<b>10.2 Principle of Electrolysis</b>	<b>116</b>
<b>10.3 Theory of ECM</b>	<b>117</b>
10.3.1 Mechanics of Machining	117
10.3.2 Electrochemical equivalent of alloys	120
10.3.3 Equivalent density of alloys	120
<b>10.4 Process Parameters</b>	<b>120</b>
<b>10.5 ECM Equipment</b>	<b>121</b>
<b>10.6 Electrolytes in ECM</b>	<b>121</b>
10.6.1 Role of electrolytes	121

10.6.2	Types of electrolytes	123
10.6.3	Different electrolyte flow configurations	123
<b>10.7</b>	<b>Power Supplies in ECM</b>	<b>125</b>
<b>10.8</b>	<b>Applications</b>	<b>126</b>
<b>10.9</b>	<b>Advantages and Limitations of ECM</b>	<b>126</b>
11.9.1	Advantages	126
11.9.2	Limitations	126
<b>10.10</b>	<b>Methods of Minimizing Stray Current Effect in ECM</b>	<b>127</b>
11.10.1	Tool insulation	127
11.10.2	Workpiece insulation using a mask	127
<b>10.11</b>	<b>Anode Shape Prediction in ECM</b>	<b>128</b>
<b>10.12</b>	<b>Environmental and Health Hazards</b>	<b>129</b>
<b>10.13</b>	<b>Some Variants of ECM</b>	<b>129</b>
10.13.1	Electrochemical drilling	130
10.13.2	Shaped tube electrolytic machining	130
10.13.3	Electrostream (capillary) drilling	131
10.13.4	Electrochemical jet drilling (ECJD)	132
10.13.5	Wire electrochemical machining	132
10.13.6	Electrochemical polishing	134
	<i>Summary</i>	135
	<i>Acronyms and Symbols</i>	135
	<i>Practice Questions</i>	137
	<i>References</i>	137
<b>11.</b>	<b>Chemical Machining</b>	<b>139–143</b>
	<b>Abstract</b>	139
<b>11.1</b>	<b>Introduction</b>	139
<b>11.2</b>	<b>Working Principle</b>	139
<b>11.3</b>	<b>Description of ChM Setup</b>	140
<b>11.4</b>	<b>Process Capabilities and Applications</b>	142
<b>11.5</b>	<b>Advantages and Disadvantages</b>	142
	<i>Summary</i>	142
	<i>Acronyms</i>	143
