

Index of Competencies

Competency Based Undergraduate Curriculum for the Indian Medical Graduate

Code	Competencies addressed	Page no.
BI10.5	Describe antigens and concept involved in vaccine development.	75, 82
CM3.3	Describe the etiology and basis of water-borne diseases.	545
CM3.6	Describe the role of vectors in the causation of diseases.	69, 786
CM14.1	Define and classify hospital waste.	37
CM14.2	Describe various methods of treatment of hospital waste.	37
CM14.3	Describe laws related to hospital waste management.	37
CT1.2	Describe and discuss the microbiology of tubercle bacillus, mode of transmission, pathogenesis, clinical evolution and natural history of pulmonary and extrapulmonary forms (including lymph nodes, bone and CNS) of tuberculosis.	205
CT1.7	Perform and interpret Montoux test, and describe and discuss the indications and pitfalls of the test.	205
CT1.13	Describe and discuss the origin, indications, technique of administration, efficacy and complications of BCG vaccine.	205
DE1.2	Discuss the role of causative microorganisms in the etiopathogenesis of dental caries.	159, 228
DE1.4	Discuss the role of dental caries as a focus of sepsis.	159, 228
DR7.1	Describe the etiology, microbiology, pathogenesis, clinical presentations and diagnostic features of dermatophytes.	475
DR7.2	Identify <i>Candida</i> species in fungal scrapings and KOH mount.	475
DR9.1	Classify, describe the epidemiology, microbiology, pathogenesis, clinical presentations and diagnostic features of leprosy.	220
DR10.1	Identify and classify syphilis based on the presentation and clinical manifestations.	233
DR10.2	Identify spirochete in dark-ground microscopy.	233
DR10.6	Describe the etiology, diagnostic and clinical features of non-syphilitic sexually transmitted diseases (chancroid, donovanosis, and lymphogranuloma venereum).	304, 332, 342, 514
DR10.7	Identify and differentiate based on the clinical features of non-syphilitic sexually transmitted diseases (chancroid, donovanosis and lymphogranuloma venereum).	304, 332, 342, 514
DR15.2	Identify <i>Staphylococcus</i> on a Gram stain.	151
IM1.3	Describe and discuss etiology, microbiology, pathogenesis and clinical evolution of rheumatic fever, criteria, degree of rheumatic activity and rheumatic valvular heart disease and its complications including infective endocarditis.	159
IM1.22	Assist and demonstrate the proper technique in collecting specimen for blood culture.	28
IM3.1	Define, discuss, describe and distinguish community acquired pneumonia, nosocomial pneumonia and aspiration pneumonia.	169, 301, 319
IM4.6	Discuss and describe the pathophysiology and manifestations of malaria.	634
IM4.13	Perform and interpret a sputum Gram stain.	28
IM4.14	Perform and interpret a sputum Ziehl-Neelsen stain.	28
IM4.15	Perform and interpret a malarial smear.	634, 772
IM4.19	Assist in the collection of blood and wound cultures.	28
IM4.20	Interpret a PPD (Mantoux).	205
IM4.23	Prescribe drugs for malaria based on the species identified, prevalence of drug resistance and national programmes.	634
IM4.26	Counsel the patient on malarial prevention.	634
IM5.4	Describe and discuss the epidemiology, microbiology, immunology and clinical evolution of infective (viral) hepatitis.	449
IM6.1	Describe and discuss the symptoms and signs of acute HIV seroconversion.	438
IM6.2	Define and classify HIV/AIDS based on the CDC criteria.	438
IM6.3	Describe and discuss the relationship between CD4+ T cell count and the risk of opportunistic infections.	438

Code	Competencies addressed	Page no.
IM6.4	Describe and discuss the pathogenesis, evolution and clinical features of common HIV related opportunistic infections.	438
IM6.10	Choose and interpret appropriate diagnostic tests and classify the severity of HIV/AIDS including specific tests of HIV, CDC.	438
IM6.18	Describe and discuss the principles and regimens used in post-exposure prophylaxis.	438
IM16.9	Identify common parasitic causes of diarrhoea under the microscope in a stool specimen.	665, 699, 719, 772
IM16.10	Identify <i>Vibrio cholerae</i> in a hanging drop specimen.	282
IM25.9	Assist in the collection of blood and other specimen cultures.	28
MI1.1	Describe different causative agents of infectious diseases, the methods used in their detection, and discuss the role of microbes in health and disease.	69
MI1.2	Perform and identify different causative agents of infectious diseases by Gram stain and Ziehl-Neelsen stain	28
MI1.3	Describe the epidemiological basis of common infectious diseases.	28
MI1.4	Classify and describe the different methods of sterilization and disinfection. Discuss the application of the different methods in the laboratory, in clinical and surgical practice.	37
MI1.5	Choose the most appropriate method of sterilization and disinfection to be used in the laboratory, in clinical and surgical practice.	37
MI1.6(a)	Describe the mechanism of drug resistance.	55
MI1.6(b)	Describe the methods of antimicrobial susceptibility testing and monitoring of antimicrobial therapy.	533
MI1.7	Describe the immunological mechanisms in health.	75
MI1.8	Describe the mechanisms of immunity and response of the host immune system to infections.	75
MI1.9(a)	Discuss the immunological basis of vaccines.	75
MI1.9(b)	Describe the universal immunization schedule.	539
MI1.10(a)	Describe the immunological mechanisms of hypersensitivity and discuss the laboratory methods used in detection of hypersensitivity.	85, 92, 97, 128
MI1.10(b)	Describe the immunological mechanisms of autoimmunity.	85, 97, 135
MI1.10(c)	Describe immunological mechanisms in immunological disorders in immunodeficiency states.	85,92, 97, 124
MI1.11	Describe the immunological mechanisms of transplantation and tumour immunity.	97, 139
MI2.1	Describe etiologic agents of rheumatic fever and their diagnosis.	97,159
MI2.2	Describe etiopathogenesis, clinical features and discuss diagnostic modalities of infective endocarditis.	92,159, 514
MI2.3	Identify the microbial agents causing rheumatic heart disease and infective endocarditis.	159
MI2.4	List the common microbial agents causing anaemia. Describe the morphology, mode of infection and discuss the pathogenesis, clinical course, diagnosis and revention and treatment of the common microbial agents causing anaemia.	608, 634, 675, 720
MI2.5	Discuss the etiopathogenesis and discuss the clinical evolution and the laboratory diagnosis of kala-azar, malaria, filariasis and other parasites prevalent in India.	609, 634, 719
MI2.6	Identify the causative agents of malaria and filariasis.	634, 719, 772
MI2.7	Describe epidemiology, the etiopathogenesis, evolution, opportunistic infections, diagnosis, prevention and the principles of management of HIV infection.	438, 769
MI3.1	Enumerate the microbial agents causing diarrhoea and dysentery. Describe the epidemiology, morphology, pathogenesis clinical features and diagnostic modalities of these agents.	247, 262, 267, 282, 514, 699, 719
MI3.2	Describe common etiological agents of diarrhoea and dysentery.	247, 262, 267, 282, 514, 665, 719
MI3.3	Describe the enteric fever pathogens and discuss the evolution of the clinical course and the laboratory diagnosis of the diseases caused by them.	267
MI3.4	Identify the different modalities for diagnosis of enteric fever. Choose the appropriate test related to the duration of illness.	267
MI3.5	Enumerate the causative agents of food poisoning and discuss the pathogenesis, clinical course and laboratory diagnosis.	151, 195, 267, 514
MI3.6	Describe the etiopathogenesis of acid peptic disease (APD) and the clinical course. Discuss the diagnosis and management of the causative agent of APD.	291
MI3.7	Describe the epidemiology, the etiopathogenesis and discuss the viral markers in the evolution of viral hepatitis. Discuss the modalities in the diagnosis and prevention of viral hepatitis.	449

Code	Competencies addressed	Page no.
MI3.8	Choose the appropriate laboratory tests in the diagnosis of viral hepatitis with emphasis on viral markers.	449
MI4.1	Enumerate the microbial agents causing anaerobic infections. Describe the etiopathogenesis, clinical course and discuss the laboratory diagnosis of anaerobic infections.	195, 228
MI4.2	Describe etiopathogenesis, clinical course and discuss the laboratory diagnosis of bone and joint infections.	151
MI4.3	Describe etiopathogenesis of infections of skin and soft tissue and discuss the clinical course and the laboratory diagnosis.	475
MI5.1	Discuss the etiopathogenesis, clinical course and discuss the laboratory diagnosis of meningitis.	169, 174, 304, 386, 400, 425, 515
MI5.2	Describe the etiopathogenesis, clinical course and discuss the laboratory diagnosis of encephalitis.	386, 400, 425
MI5.3	Identify the microbial agents causing meningitis.	169, 174, 296, 304, 386, 400, 425, 514
MI6.1	Describe the etiopathogenesis, laboratory diagnosis and prevention of infections of upper and lower respiratory tract.	28, 514
MI6.2	Identify the common etiologic agents of upper respiratory tract infections (Gram staining).	28, 151, 169, 514
MI6.3	Identify the common etiologic agents of lower respiratory tract infections (Gram stain and Ziehl-Neelsen stain).	28, 169, 514
MI7.1	Describe the etiopathogenesis and discuss laboratory diagnosis of infections of genitourinary system.	28, 514
MI7.2	Describe the etiopathogenesis and discuss the laboratory diagnosis of sexually transmitted infections. Describe the preventive measures.	28, 514, 608
MI7.3	Describe the etiopathogenesis, clinical features, the appropriate method for specimen collection, and discuss the laboratory diagnosis of urinary tract infections.	151, 159, 175, 206, 248, 259, 292, 297, 320, 515
MI8.1	Enumerate the microbial agents and their vectors causing zoonotic diseases. Describe the morphology, mode of transmission, pathogenesis and discuss the clinical course, laboratory diagnosis and prevention.	69, 276
MI8.2	Describe the etiopathogenesis of opportunistic infections (OI) and discuss the factors contributing to the occurrence of OI, and the laboratory diagnosis.	438
MI8.3	Describe the role of oncogenic viruses in the evolution of virus-associated malignancy.	465
MI8.4	Describe etiologic agents of emerging infectious diseases. Discuss the clinical course and diagnosis.	511
MI8.5	Define healthcare-associated infections (HAI) and enumerate the types. Discuss the factors that contribute to the development of HAI and the methods for prevention.	438
MI8.6	Describe the basics of infection control.	50, 530
MI8.7	Demonstrate infection control practices and use of personal protective equipment (PPE).	50, 530
MI8.8	Describe the methods used and significance of assessing the microbial contamination of food, water and air.	545
MI8.9	Discuss the appropriate method of collection of specimen in the performance of laboratory tests in the detection of microbial agents causing infectious disease.	28
MI8.11	Demonstrate respect for patient samples sent to the laboratory for performance of laboratory tests in the detection of microbial agents causing infectious disease.	565
MI8.12	Discuss confidentiality pertaining to patient identity in laboratory results.	559
MI8.13	Discuss the appropriate laboratory test in the diagnosis of the infectious disease.	559
MI8.14	Demonstrate confidentiality pertaining to patient identity in laboratory results.	565
MI8.15	Choose and interpret the results of the laboratory tests used in diagnosis of infectious disease.	559
MI8.16	Describe the National Health Programmes in the prevention of common infectious diseases.	539
PA7.5	Describe the immunology and the immune response to cancer.	139
PA9.1	Describe the principles and mechanisms involved in immunity.	110
PA9.2	Describe the mechanisms of hypersensitivity reactions.	128
PA9.3	Describe the HLA system and the immune principles involved in transplant and mechanisms of transplant rejection.	139
PA9.6	Define and describe the pathogenesis and pathology of HIV and AIDS.	438

Code	Competencies addressed	Page no.
PA10.1	Define and describe the pathogenesis and pathology of malaria.	635
PA10.2	Define and describe the pathogenesis and pathology of cysticercosis.	675
PA10.3	Define and describe the pathogenesis and pathology of leprosy.	220
PA10.4	Define and describe the pathogenesis and pathology of common protozoal and helminthic diseases.	591, 608, 634, 675, 699, 719
PA22.5	Enumerate and describe infections transmitted by blood transfusion.	145
PA26.4	Define and describe the etiology, types, pathogenesis, stages, morphology, microscopic appearance and complications of tuberculosis.	205
PA35.1	Describe the etiology, pathogenesis, differentiating factors and CSF findings in meningitis.	514
PE19.1	Explain the components of the Universal Immunization Programme and the Sub-National Immunization Programmes.	539
PE26.12	Discuss the prevention of hepatitis B infection-universal precautions and immunisation.	449
PE30.13	Discuss the etiopathogenesis, clinical features, management and prevention of poliomyelitis in children.	400
PE34.7	Interpret a Mantoux test.	205
PE34.11	Perform Ziehl-Neelsen staining.	28
PE34.12	Enumerate the indications and discuss the limitation of methods of culturing <i>Mycobacterium tuberculosis</i> .	205, 349
PH1.43	Describe and discuss the rational use of antimicrobials including antibiotic stewardship programme.	530
PH1.45	Describe the drugs used in multidrug-resistant tuberculosis (MDR-TB) and extensively drug-resistant tuberculosis (XDR-TB).	205
PH1.47	Describe the mechanisms of infection, types, doses, side effects, indications and contraindications of the drugs used in malaria, kala-azar, amebiasis and intestinal helminthiasis.	591, 609, 634, 675, 699, 719
SU13.1	Describe the immunological basis of organ transplantation.	139
SU14.1	Describe aseptic techniques, sterilization and disinfection.	37
SU15.1	Describe classification of hospital waste and appropriate methods of disposal.	37
SU29.3	Describe the clinical features, investigations and principles of management of urinary tract infection.	514

Contents

<i>Preface to the Seventh Edition</i>	vii
<i>Preface to the First Edition</i>	ix
<i>Index of Competencies</i>	xi

Section 1: General Bacteriology

1. Introduction	3		
Origin of microbial life	3		
The developing science of microbiology	4		
Koch's postulates	4		
The beginning of virology	5		
Contributions of various scientists in the field of microbiology	5		
2. Morphology of Bacteria	9		
Size of bacteria	9		
Shape of bacteria	10		
Group patterns	11		
Anatomy of a bacterial cell	11		
3. Growth and Nutrition of Bacteria	20		
Bacterial growth	20		
Bacterial growth curve	20		
Culture media	21		
Environmental factors influencing growth	23		
Culture methods	24		
Aerobic culture	25		
Culture in an atmosphere with added carbon dioxide	25		
Culture in microaerophilic atmosphere	25		
Anaerobic culture	25		
4. Collection of Specimens, Identification of Bacteria and Taxonomy	28		
General rules for collection and transportation of specimen	28		
Identification of bacteria	30		
Bacterial taxonomy	34		
5. Sterilization, Disinfection and Biomedical Waste Management	37		
A. Physical agents	37		
1. Sunlight	37		
2. Drying	37		
3. Heat	37		
4. Filtration	41		
5. Radiations	42		
B. Chemical agents	42		
1. Phenols	42		
2. Halogens	43		
3. Metallic salts	43		
4. Aldehydes	43		
5. Alcohols	43		
6. Dyes	43		
7. Vapour-phase disinfectants	44		
8. Surface active disinfectants	44		
Biomedical Waste Management Rules, 2016	45		
6. Hand Hygiene and Personal Protective Equipment (PPE)	50		
7. Bacterial Genetics	55		
Structure of DNA	55		
Structure of RNA	55		
Extrachromosomal genetic elements	56		
Genotypic and phenotypic variations	56		
Lac operon (gene regulation)	57		
Mutation	57		
Acquisition of new genes	59		
Antibiotic resistance	62		
Transposable genetic elements	63		
Genetic engineering (recombinant DNA technology)	63		
DNA probes	65		
Polymerase chain reaction (PCR)	65		
8. Bacteria in Health and Disease	69		
Infection	69		
Sources of infection	70		
Modes of spread of infection	71		
9. Immunity	75		
I. Innate immunity	75		
II. Acquired immunity	78		
Adoptive immunity	80		
Local immunity	80		
Herd immunity	80		

10. Antigen	82	16. Immunodeficiency Diseases	124
Superantigens 84		Primary immunodeficiency syndromes 124	
11. Antibodies	85	Secondary immunodeficiency 127	
Antibody structure 85		17. Hypersensitivity	128
Immunoglobulins as antigens 87		Type I hypersensitivity: Anaphylactic 128	
Immunoglobulin classes 87		Type II hypersensitivity: Cytotoxic 130	
Abnormal immunoglobulins 90		Type III hypersensitivity: Immune complex 131	
12. The Complement System	92	Type IV hypersensitivity: Cell-mediated or delayed 132	
13. Antigen–Antibody Reactions	97	Type V hypersensitivity: Stimulatory or anti-receptor 133	
Characteristics of antigen–antibody reactions 97		Shwartzman reaction 133	
Methods used to detect and quantitate antigen and antibody 98		18. Autoimmunity	135
14. Architecture of the Immune System	110	Mechanism of autoimmunity 135	
Primary lymphoid organs 110		Classification of autoimmune diseases 136	
Peripheral lymphoid organs 111		19. Histocompatibility Systems	139
Cells of the immune system 112		Types of grafts 139	
15. Immune Response	117	Allograft reaction 139	
Humoral or antibody-mediated immune response 117		Major histocompatibility complex 139	
Cell-mediated immune responses 120		Histocompatibility testing 140	
		Graft versus host reaction 141	
		Foetus as a graft 141	
		Tumour immunology 141	
		20. Immunohaematology	145

Section 2: Systemic Bacteriology

21. Staphylococcus	151	<i>Clostridium tetani</i> 199	
<i>Staphylococcus aureus</i> 151		<i>Clostridium botulinum</i> 202	
Coagulase-negative staphylococci 156		28. Mycobacterium tuberculosis	205
Other coagulase-negative staphylococci 157		<i>Mycobacterium tuberculosis</i> complex 205	
22. Streptococcus and Enterococcus	159	29. Non-tuberculous Mycobacteria	216
Classification 159		30. Mycobacterium leprae	220
23. Streptococcus pneumoniae (Pneumococcus)	169	<i>Mycobacterium lepraemurium</i> 226	
24. Neisseria, Moraxella and Acinetobacter	174	31. Non-sporing Anaerobes	228
<i>Neisseria meningitidis</i> (meningococcus) 174		Bacteroidaceae 230	
<i>Neisseria gonorrhoeae</i> (gonococcus) 177		32. Spirochaetes	233
Non-gonococcal urethritis (NGU) 180		<i>Treponema</i> 233	
<i>Kingella</i> 180		<i>Treponema pallidum</i> 234	
<i>Moraxella</i> 180		Non-venereal treponematoses 240	
<i>Acinetobacter</i> 181		<i>Borrelia</i> 241	
25. Corynebacterium	183	Relapsing fever 241	
<i>Corynebacterium diphtheriae</i> 183		<i>Borrelia vincentii</i> 242	
Non-diphtheria corynebacteria (diphtheroids) 188		<i>Borrelia burgdorferi</i> 242	
26. Bacillus	190	<i>Leptospira</i> 243	
<i>Bacillus anthracis</i> 190		<i>Leptospira interrogans</i> 243	
<i>Bacillus cereus</i> 192		33. Enterobacteriaceae: Escherichia, Klebsiella and Other Genera	247
27. Clostridium	195	34. Proteus, Morganella and Providencia	258
<i>Clostridium perfringens</i> (<i>Clostridium welchii</i>) 195			
<i>Clostridium difficile</i> 199			

35. <i>Shigella</i>	262	45. <i>Mycoplasma and Ureaplasma</i>	319
36. <i>Salmonella</i>	267	Atypical pneumonia	322
37. <i>Yersinia</i>	276	46. <i>Rickettsia, Orientia, Ehrlichia, Anaplasma, Neorickettsia, Coxiella and Bartonella</i>	324
38. <i>Vibrio, Aeromonas and Plesiomonas</i>	282	Rickettsiaceae	324
Halophilic vibrios	287	Anaplasmataceae	328
39. <i>Campylobacter, Helicobacter and Spirillum</i>	291	Coxiellaceae	328
<i>Campylobacter</i>	291	Bartonellaceae	329
<i>Helicobacter</i>	293	47. <i>Chlamydia and Chlamydophila</i>	332
<i>Spirillum minus</i>	294	48. <i>Actinomycetes</i>	338
40. <i>Pseudomonas and Burkholderia</i>	296	49. <i>Miscellaneous Bacteria</i>	342
41. <i>Legionella</i>	301	50. <i>Automation in Microbiology</i>	349
42. <i>Haemophilus</i>	304	1. Automated specimen processing	350
Other haemophili	307	2. Automated identification and antimicrobial susceptibility testing systems	350
43. <i>Bordetella</i>	310	3. Molecular automation	352
44. <i>Brucella</i>	314	4. Total laboratory automation (TLA)	353
		5. Proteomic-based automated identification system	353
		Criteria for evaluation and selection of automated system	353

Section 3: Virology

51. <i>General Properties of Viruses</i>	357	Human herpesvirus 7	392
Structure of the viruses	357	Human herpesvirus 8	392
Shape	358	Cercopithecine herpesvirus 1	392
Susceptibility to physical and chemical agents	358	56. <i>Adenoviruses, Parvoviruses, Papillomaviruses and Polyomaviruses</i>	394
Viral haemagglutination	359	Adenoviruses	394
Replication of viruses	359	Parvoviruses	394
Virus isolation	362	Papillomaviruses and polyomaviruses	396
Viral assay	364	57. <i>Picornaviruses</i>	400
Viral genetics	365	Enteroviruses	400
Nomenclature of viruses	366	Rhinoviruses	403
Classification of viruses	366	Hepatovirus (hepatitis A virus)	404
52. <i>Virus–Host Interactions, Laboratory Diagnosis of Viral Infections, and Viral Vaccines</i>	370	58. <i>Rhabdoviruses</i>	406
Transmission of human virus infections	371	Rabies virus	406
Host response to virus infection	372	Vesiculovirus	410
Laboratory diagnosis of viral infections	373	59. <i>Orthomyxoviruses</i>	412
Viral vaccines	374	60. <i>Paramyxoviruses, Respiratory Syncytial Virus and Human Metapneumovirus</i>	418
Antiviral therapy	375	61. <i>Caliciviruses, Astroviruses and Coronaviruses</i>	422
53. <i>Bacteriophage</i>	378	Caliciviruses	422
54. <i>Poxviruses</i>	381	Astroviruses	422
55. <i>Herpesviruses</i>	386	Coronaviruses	422
Herpes simplex virus (HSV)	386		
Varicella-zoster virus (VZV)	388		
Epstein-Barr virus (EBV)	389		
Cytomegalovirus (CMV)	391		
Human herpesvirus 6	392		

62. Arboviruses	425	Hepatitis C virus (HCV)	454
Togaviridae	426	Hepatitis D virus (HDV)	455
Alphaviruses	426	Hepatitis E virus (HEV)	456
Rubella virus	427	Hepatitis G virus (HGV)	456
Flaviviridae	428	SEN virus (SEN-V)	457
Bunyaviridae	431	Transfusion-transmitted virus (TTV)	457
63. Filoviruses, Arenaviruses and Reoviridae	434	66. SARS-CoV-2 Virus	460
Filoviruses	434	67. Oncogenic (Tumour) Viruses	465
Arenaviruses	434	Oncogenic DNA viruses	467
Reoviridae	435	Oncogenic RNA viruses	467
64. Human Immunodeficiency Virus: AIDS	438	68. Slow Virus Infections and Prions	469
Human immunodeficiency viruses	438	Slow virus infections	469
65. Hepatitis Viruses	449	Prions	470
Hepatitis A virus (HAV)	449		
Hepatitis B virus (HBV)	450		

Section 4: Medical Mycology

69. Medical Mycology	475	III. Systemic mycoses	489
Classification of fungi	476	IV. Opportunistic mycoses	493
Laboratory diagnosis of mycoses	476	Superficial infections	493
Classification of mycoses	478	Deep infections	495
I. Superficial mycoses	479	Disseminated candidiasis and candidemia	495
II. Subcutaneous mycoses	483		

Section 5: Clinical Microbiology

70. Emerging and Reemerging Infectious Diseases	511	72. Nosocomial Infections	530
		Antibiotic policy	531
71. Infective Syndromes and Clinical Case Based Exercises	514	73. Antimicrobial Sensitivity Testing	533
		74. Prophylactic Immunization	539

Section 6: Bacteriology of Water, Milk and Air, and Biological Warfare

75. Bacteriology of Water, Milk and Air	545	76. Biological Warfare	551
Bacteriology of water	545	Hippocratic oath	551
Bacteriology of milk	547		
Bacteriology of air	548		

Section 7: Quality Assurance, Ethics and Overview of Microbiology

77. Quality Assurance in Microbiology Laboratory	559	79. Overview of Microbiology	567
78. Ethics in Laboratory Medicine	565		

Section 8: General Parasitology

- 80. General Parasitology** 575
- Parasite 575
 - Why a human embryo or foetus is not a parasite? 575
 - Host 575
 - Host-parasite relationships 576
 - Sources of infection 577
 - Portal of entry into the body 577
 - Life cycle of human parasites 578
 - Pathogenicity 578
 - Immunity in parasitic infections 579
 - Classification of parasites 582
 - Nomenclature of parasites 582

Section 9: Protozoology

- 81. Unicellular Parasites** 589
- Kingdom Protozoa 589
 - Phyla Metamonada, Parabasala, Percolozoa and Euglenozoa 589
 - Phylum Amoebozoa 589
 - Phylum Sporozoa 589
 - Phylum Ciliophora 589
 - Kingdom Stramenopila (formerly Chromista) 589
 - Phylum Bigyra 589
 - Kingdom Fungi 589
 - Phylum Microspora (Microsporidians) 589
- 82. Amoebae and *Naegleria fowleri*** 591
- Entamoeba histolytica* 591
 - Non-pathogenic amoebae 598
 - Entamoeba dispar* 598
 - Entamoeba hartmanni* 598
 - Entamoeba coli* 598
 - Entamoeba polecki* 598
 - Entamoeba gingivalis* 599
 - Endolimax nana* 599
 - Iodamoeba bütschlii* 600
 - Opportunistic protozoa 601
 - Naegleria fowleri* 601
 - Acanthamoeba* species 602
 - Balamuthia mandrillaris* 604
- 83. Flagellates** 608
- Intestinal, oral and genital flagellates 608
 - Giardia lamblia* (*G. duodenalis*; *G. intestindis*) 608
 - Trichomonas* 611
 - Trichomonas tenax* 611
 - Trichomonas hominis* 611
 - Trichomonas vaginalis* 611
 - Chilomastix mesnili* 613
 - Enteromonas hominis* 613
 - Retortamonas intestinalis* 614
 - Dientamoeba fragilis* 614
 - Blood and tissue flagellates 615
 - Leishmania* 615
 - Old World leishmaniasis 616
 - Leishmania donovani* 616
 - Post kala-azar dermal leishmaniasis 619
 - Leishmania infantum* 620
 - Leishmania tropica* complex 620
 - Leishmania tropica* 620
 - Leishmania major* 621
 - Leishmania aethiopica* 621
 - New World leishmaniasis 621
 - Leishmania braziliensis* complex and *Leishmania mexicana* complex 621
 - Leishmania peruviana* 622
 - Leishmania chagasi* 622
 - Trypanosomes 622
 - Trypanosoma brucei gambiense* 623
 - Trypanosoma brucei rhodesiense* 625
 - Trypanosoma cruzi* 626
 - Trypanosoma rangeli* 629
- 84. Sporozoa** 634
- Malaria parasites 634
 - Babesia* 646
 - Toxoplasma gondii* 647
 - Sarcocystis* species 652
 - Cytoisospora (Isospora) belli* 654
 - Cyclospora cayetanensis* 656
 - Cryptosporidium parvum* 657
 - Blastocystis* species 660
- 85. *Balantidium coli*** 665
- 86. Microsporidia** 668

Section 10: Helminthology

- 87. Introduction to Helminths** 673
- 88. Cestodes or Tapeworms** 675
- General characteristics of cestodes 675
 - Classification of cestodes 676
 - Diphyllobothrium latum* 677
 - Spirometra* species 679
 - Taenia* species 680
 - Taenia saginata* and *Taenia solium* 681
 - Taenia asiatica* 684

Taenia multiceps 684
Hymenolepis nana 685
Hymenolepis diminuta 686
Dipylidium caninum 688
Echinococcus granulosus 690
Echinococcus multilocularis 694
Echinococcus vogeli 695

89. Trematodes or Flukes 699

General characteristics 699
 Classification of trematodes 700
 Schistosomes or blood flukes 700
Schistosoma mekongi 704
Schistosoma intercalatum 704
Fasciola hepatica 704
Fasciola gigantica 707
Fasciolopsis buski 707
Clonorchis sinensis 709
Paragonimus westermani 711
 Trematodes of minor importance 713
Gastrodiscoides hominis 713
Watsonius watsoni 714
Opisthorchis felinus 714
Opisthorchis viverrini 714
Heterophyes heterophyes 714
Metagonimus yokogawai 715

90. Nematodes 719

General characteristics 719
 Modes of infection with nematode parasites 720
 Classification of nematodes 720
Trichinella spiralis 720
Trichuris trichiura 723
Strongyloides stercoralis 724
 Hookworms 728
Ancylostoma duodenale 728
Necator americanus 731
Ancylostoma braziliense 731
Ancylostoma ceylanicum 732
Ancylostoma caninum 732

Cutaneous larva migrans 732
Enterobius vermicularis 733
Ascaris lumbricoides 735
Ascaris suum 738
 Visceral larva migrans 739
Baylisascaris procyonis 739
 Filarial nematodes 739
Wuchereria bancrofti 740
 Occult filariasis 744
 Tropical pulmonary eosinophilia (TPE) 744
Brugia malayi 746
Brugia timori 746
Loa loa 747
Onchocerca volvulus 748
Mansonella streptocerca 749
Mansonella ozzardi 750
Mansonella perstans 750
Dirofilaria species 750
Dirofilaria immitis 750
 Other *Dirofilaria* species 751
 Other nematodes 751
Dracunculus medinensis 751
Angiostrongylus species 752
Angiostrongylus cantonensis 752
Angiostrongylus costaricensis 753
Gnathostoma species 754
Gnathostoma spinigerum 754
Gnathostoma hispidum 756
Gnathostoma doloresi 756
Gnathostoma nipponicum 756
Ternidens deminutus 756
Capillaria philippinensis 757
Capillaria hepatica 758
Capillaria aerophila 758
Anisakis simplex 758
Oesophagostomum species 759
Trichostrongylus species 759
Thelazia callipaeda 760
Dioctophyma renale 760

Section 11: Applied Parasitology, Diagnostic Procedures and Overview

91. Parasitic Opportunistic Infections in AIDS Cases and Nosocomial Parasitic Infections 769

Parasitic opportunistic infections in AIDS cases 769
Toxoplasma gondii 769
Cryptosporidium parvum 769
Cytoisospora belli 770
Microsporidia 770
Entamoeba histolytica 770
Giardia lamblia 770
Cyclospora cayetanensis 770
Leishmania species 770
Strongyloides stercoralis 770
 Free-living protozoa 771
 Nosocomial parasitic infections 771
 Nosocomial gastrointestinal infections 771
 Nosocomial blood and tissue infections 771
 Nosocomial infections in the paediatric patients 771

92. Diagnostic Procedures 772

Examination of faeces 772
 Examination of urine 778
 Examination of sputum 778
 Examination of aspirates 778
 Examination of cerebrospinal fluid 778
 Examination of biopsy material 778
 Examination of blood 779
 Culture methods 782
 Serologic diagnosis 782
 Molecular biology 783
 Controlling microscopy 783

93. Medically Important Arthropods 785

Insects 786
 Mosquitoes 786
 Sandflies 787

Beetles	787		
Reduviid bugs	788		
Fleas	788		
Lice	788		
Other biting flies	788		
Midges	788		
Arachnids	788		
Ticks	788		
Other arthropods	788		
94. Quality Assurance in Parasitology	790		
95. Ethics in Laboratory Medicine	793		
96. Overview of Medical Parasitology	795		
Habitat	975		
Morphology	996		
Portal of entry	996		
Source of infection	797		
Life cycle	797		
Obligate intracellular parasites	798		
Symptomatology	798		
Clinical samples	799		
		Parasites which can be cultured in the laboratory	800
		Skin tests	800
		Classification of nematodes	800
		Nematodes which do not show systemic migration in man	800
		Types of microfilariae	801
		Parasitic causes of travellers' diarrhoea	801
		Concomitant immunity	801
		Life-long immunity	801
		Universal precautions	801
		Most lethal of all helminthic infections of man	801
		Both male and female worms remain coiled together and it is difficult to separate them	801
		<i>Various Protozoa</i>	802
		<i>Relative Sizes of Helminth Eggs</i>	803
		<i>Index</i>	805

General Bacteriology

1. Introduction	3		
Origin of microbial life	3		
The developing science of microbiology	4		
Koch's postulates	4		
The beginning of virology	5		
Contributions of various scientists in the field of microbiology	5		
2. Morphology of Bacteria	9		
Size of bacteria	9		
Shape of bacteria	10		
Group patterns	11		
Anatomy of a bacterial cell	11		
3. Growth and Nutrition of Bacteria	20		
Bacterial growth	20		
Bacterial growth curve	20		
Culture media	21		
Environmental factors influencing growth	23		
Culture methods	24		
Aerobic culture	25		
Culture in an atmosphere with added carbon dioxide	25		
Culture in microaerophilic atmosphere	25		
Anaerobic culture	25		
4. Collection of Specimens, Identification of Bacteria and Taxonomy	28		
General rules for collection and transportation of specimen	28		
Identification of bacteria	30		
Bacterial taxonomy	34		
5. Sterilization, Disinfection and Biomedical Waste Management	37		
A. Physical agents	37		
1. Sunlight	37		
2. Drying	37		
3. Heat	37		
4. Filtration	41		
5. Radiations	42		
B. Chemical agents	42		
1. Phenols	42		
2. Halogens	43		
3. Metallic salts	43		
4. Aldehydes	43		
5. Alcohols	43		
6. Dyes	43		
7. Vapour-phase disinfectants	44		
8. Surface active disinfectants	44		
Biomedical Waste Management Rules, 2016	45		
6. Hand Hygiene and Personal Protective Equipment (PPE)	50		
7. Bacterial Genetics	55		
Structure of DNA	55		
Structure of RNA	55		
Extrachromosomal genetic elements	56		
Genotypic and phenotypic variations	56		
Lac operon (gene regulation)	57		
Mutation	57		
Acquisition of new genes	59		
Antibiotic resistance	62		
Transposable genetic elements	63		
Genetic engineering (recombinant DNA technology)	63		
DNA probes	65		
Polymerase chain reaction (PCR)	65		
8. Bacteria in Health and Disease	69		
Infection	69		
Sources of infection	70		
Modes of spread of infection	71		
9. Immunity	75		
I. Innate immunity	75		
II. Acquired immunity	78		
Adoptive immunity	80		
Local immunity	80		
Herd immunity	80		
10. Antigens	82		
Superantigens	84		
11. Antibodies	85		
Antibody structure	85		
Immunoglobulins as antigens	87		
Immunoglobulin classes	87		
Abnormal immunoglobulins	90		

12. The Complement System	92		
13. Antigen–Antibody Reactions	97		
Characteristics of antigen–antibody reactions	97		
Methods used to detect and quantitate antigen and antibody	98		
14. Architecture of the Immune System	110		
Primary lymphoid organs	110		
Peripheral lymphoid organs	111		
Cells of the immune system	112		
15. Immune Response	117		
Humoral or antibody-mediated immune response	117		
Cell-mediated immune responses	120		
16. Immunodeficiency Diseases	124		
Primary immunodeficiency syndromes	124		
Secondary immunodeficiency	127		
17. Hypersensitivity	128		
Type I hypersensitivity: Anaphylactic	128		
Type II hypersensitivity: Cytotoxic	130		
		Type III hypersensitivity: Immune complex	131
		Type IV hypersensitivity: Cell-mediated or delayed	132
		Type V hypersensitivity: Stimulatory or anti-receptor	133
		Shwartzman reaction	133
		18. Autoimmunity	135
		Mechanism of autoimmunity	135
		Classification of autoimmune diseases	136
		19. Histocompatibility Systems	139
		Types of grafts	139
		Allograft reaction	139
		Major histocompatibility complex	139
		Histocompatibility testing	140
		Graft versus host reaction	141
		Foetus as a graft	141
		Tumour immunology	141
		20. Immunohaematology	145
