<i>Special Features of the Book</i>	xi
<i>Syllabus</i>	xv

SECTION A GENERAL MICROBIOLOGY

Chapter 1	History and Principles of Microbiology	3–19
•	How Microbiology Evolved?	4
	Golden Age of Microbiology	
•	Robert Koch and Principles of Microbiology	7
•	Applications of Microbiology	10
•	Microbiology and its Branches.....	11
•	Antimicrobial Therapy.....	12
•	Virology	13
•	Immunology	14
•	Scope of Medical Microbiology.....	15
Chapter 2	Importance and Relevance of Microbiology	21–24
•	Importance of Microbiology	21
Chapter 3	Normal Flora and Sources of Infection	25–34
•	Significance of Normal Flora.....	25
•	Normal Flora on Skin	27
•	Normal Flora on Nails	28
•	Normal Flora of Mouth and Respiratory Tract	28
•	Normal Flora of Gastrointestinal Tract.....	28
•	Normal Flora of Urogenital Region.....	29
•	Normal Conjunctival Flora.....	29
	Infection	
•	Sources and Reservoirs of Infection.....	30

Chapter 4	Bacterial Cell	35–49
•	Morphology	36
•	Structures External to the Cell Wall	36
•	Cell Wall	38
•	Structures Internal to the Cell Wall	39
•	Cytoplasm of Bacterial Cell	41
•	Motility	42
•	Bacterial Reproduction/Multiplication	44
•	Bacterial Spores	45
Chapter 5	Essentials of Bacterial Growth	51–59
•	Bacterial Growth	51
•	Bacterial Growth Curve	56
Chapter 6	Disinfection and Sterilization	61–85
•	Disinfection	61
•	Disinfectants	62
•	Sterilization	68
•	Methods of Sterilization	69
•	Radiations as Sterilizers	76
•	High Energy Electrons—Electron Beam Accelerator	79
•	Filtration	79
•	Ultrasonic and Sonic Vibrations	81
•	Fumigation	81
Chapter 7	Prevention of Infectious Diseases	87–96
•	Universal/Standard Precautions	88
•	Prevention of Nosocomial Infections	92
Chapter 8	Identification of Infectious Diseases	97–116
•	Collection of Specimen	98
•	Laboratory Diagnosis	98
	Methods for Detection of Antigen-Antibody Reactions	
•	Agglutination	102
•	Flocculation Reactions	104
•	Precipitation Reactions	104
•	Neutralization Reactions	113
•	Modern Methods of Identification of Organism in a Clinical Laboratory	113
Chapter 9	Antimicrobials—Resistance	117–127
•	Antibiotics	118
•	Antimicrobial Resistance	121
•	Antimicrobial Sensitivity Testing	123
•	Antimicrobial Stewardship	125

SECTION B IMMUNOLOGY

Chapter 10 Immunology	131–147
• Basic Principles of Immunity.....	132
• Antigen and Antibody	137
• Humoral and Cellular Immunity.....	140
Chapter 11 Hypersensitivity Reactions	149–164
• Immediate and Delayed Hypersensitivity.....	149
• Type I Hypersensitivity.....	151
• Type II Hypersensitivity.....	155
• Type III Hypersensitivity.....	156
• Type IV Hypersensitivity	159
• Autoimmunity.....	161

SECTION C BACTERIOLOGY

Chapter 12 Cocci	167–189
• Staphylococci	167
• Coagulase Negative Staphylococci	174
• Streptococci	174
• Other Medically Important Streptococci	180
• Pneumococci or Streptococcus Pneumoniae.....	182
Chapter 13 Mycobacteria	191–206
• Classification of Mycobacteria According to Pathogenicity	191
• Mycobacterium Tuberculosis	192
• Mycobacterium Leprae.....	201
• Atypical Mycobacteria	203
Chapter 14 Gram-Negative Bacilli Part 1	207–233
• <i>Escherichia coli</i>	207
• <i>Shigella dysenteriae</i>	212
• <i>Salmonella typhi</i>	215
• <i>Klebsiella pneumoniae</i>	220
• <i>Proteus</i>	223
• <i>Yersinia pestis</i>	225
Chapter 15 Gram-Negative Bacilli Part 2	235–248
• <i>Vibrio Cholerae</i>	235
• <i>Pseudomonas Aeruginosa</i>	238
• <i>Campylobacter Jejuni</i>	241
• <i>Helicobacter Pylori</i>	243

Chapter 16 Sporing and Nonsporing Microbes 249–282

Sporing Aerobes	249
• Bacillus Anthracis	249
Sporing Anaerobes	253
• Clostridium Tetani	253
• Clostridium Botulinum	257
• Clostridium Perfringens/Clostridium Welchii	261
• Clostridium Difficile	265
Nonsporing Anaerobes	266
• Spirochetes Treponema Pallidum	271
• Borrelia Burgdorferi	275
• Leptospira Icterohaemorrhagiae	277

SECTION D VIROLOGY**Chapter 17 Virology 285–316**

• Historical Timeline	285
• Classification of Animal Viruses	286
• Size	288
• Structure	290
• Resistance to Physical and Chemical Agents	290
• Replication of Viruses	290
• Laboratory Diagnosis of Viral Diseases	292
• Virus Isolation	294
• Prophylaxis of Viral Diseases	296
• Poliomyelitis	297
• Hepatitis Viruses	300
• Human Immunodeficiency Virus	307
• Treatment and Prevention	309
• COVID-19 Virus	309
• Omicron	314

SECTION E MYCOLOGY**Chapter 18 Medical Mycology 319–343**

• General Characteristics of Fungi	320
• Pathogenicity	323
• Laboratory Diagnosis of Fungal Diseases	323
• Treatment	325
• Superficial Mycosis Dermatophytosis	325
• Tinea Nigra	328
• Piedra	328
• Pityriasis Versicolor (Tinea Versicolor)	328

Contents

• Subcutaneous Mycoses Sporotrichosis	329
• Mycetoma.....	330
• Systemic Mycoses Histoplasmosis.....	331
• Coccidioidomycosis	332
• Candidiasis	333
• Opportunistic Mycoses Aspergillosis.....	335
• Penicillosis	337
• Zygomycosis.....	338
• Cryptococcosis.....	339
• Biochemical Confirmation	342

Clinical/Applied Microbiology **345–375**

1. Zoonosis.....	345
2. Bacterial Zoonotic Diseases	346
3. Rickettsial Zoonotic Diseases	349
4. Parasitic Zoonotic Diseases.....	350
5. Viral Zoonotic Diseases.....	352
6. Burns.....	354
7. Pyrexia of Unknown Origin	358
8. Central Nervous System Infections	360
9. Urinary Tract Infections.....	362
10. Opportunistic Infections	364
11. Some Medically Important Parasitic Diseases.....	365
12. Pelvic Inflammatory Disease.....	370
13. Acute Respiratory Infections.....	371
14. Sexually Transmitted Diseases	373
15. Identification of Bacteria	374

Terminology **377–386**

<i>Index</i>	387–394
