<i>Preface</i>	v
1. Historical Aspects	1-3
2. Basic Essentials	4-26
2.1 Anatomy and Physiology of Blood Circulation, 4	
2.2 Blood, 10	
2.3 Genes and Inheritance, 17	
2.4 Basic Procedure – Specimen Collections, 18	
2.5 Units and Measurement, 21	
2.6 Basic Equipments, 21	
3. Blood Banking	27-52
3.1 Organisation, Planning and Management, 27	
3.2 Design, Set Up, 31	
3.3 Documentation and Record, 33	
3.4 Blood Donor : Motivation, Recruitment, Selection Criteria, Collection of Blood and Post Collection, 35	
3.5 Storage, Preservation, Anticoagulant, 44	
3.6 Protocol for Outdoor Donation Camp, 51	
4. Immunohaematology	53-66
4.1 Introduction, 53	
4.2 Antigen, 53	
4.3 Antibody, 54	
4.4 Immunoglobulin, 55	
4.5 Antigen-Antibody Reaction in vitro, 58	
4.6 Complement and Complement Fixation Test, 60	
4.7 Immune Response, 63	

5. Blood Group System	67–125
5.1 ABO Blood Group System and ABO Variant, 67	
5.2 Biochemistry, Genetics and Inheritance of ABO System Antibody of ABO System, 70	
5.3 ABO System Laboratory Aspect Grouping, Reagents and Standardisation, Titration, Monoclonal Antibody, 75	
5.4 Secretor Status and Blood Group Substance, 93	
5.5 Rh Blood Group System, Inheritance and Genetics, Laboratory Detection and Variants, 99	
5.6 LW antigen, 111	
5.7 Other Blood Group System, 109	
MNSs, Kidd, Lutheran, Kell system, Duffy system, In ^a system, Xg blood group system, Bg antigen, Diego, Yt system, Chido and Rogers, Sid and Cad, Cotton, Dombrock, Sciana, Auberger, Wright, Antithetical Antigen, Haemolytic transfusion reaction	
6. Antiglobulin	126–139
6.1 History and Introduction of Anti-Human Globulin, 126	
6.2 Preparation and Standardisation of AHG Reagent, 127	
6.3 Coomb's Test, 129	
6.4 Factors Influencing Test and Source of Errors, 136	
7. Antibody Screening and Identification	140–150
8. Processing of Blood	151–187
8.1 Donor's Blood Syphilis Malaria, Hepatitis, 151	
8.2 Recipient Blood, 173	
8.3 Choice and Selection of Blood, 174	
8.4 Cross Matching of Blood, 177	
8.5 Special Type of Cross Matching, 181	
8.6 Issue of Blood in Emergency Life Saving Situation, 185	
8.7 Issue of Blood in Neonate and Infants, 186	
9. Some Related Topics	188–212
9.1 Glucose 6 Phosphate Dehydrogenase (G ₆ PD) Deficiency, 188	
9.2 HLA System, 191	
9.3 Organ Transplant and Blood Transfusion, 206	
9.4 Graft vs. host disease, 210	
10. Transfusion Practice Clinical Aspects and Applications	213–321
10.1 Transfusion, 213	
10.2 Types of Transfusion, Main Objective of Blood Transfusion, 215	
10.3 Special Procedure, 224	
10.4 Disseminated Intravascular Coagulation with Special Reference to Snake Bite, 246	

10.5	Hazard of Transfusion-Haemolytic Transfusion Reaction (HTR), Transfusion Transmitted Disease (TTD), Bacterial, Parasite, Virus – Hepatitis and HIV, Malignancy and Neoplasia, Other Common Transfusion associated hazard, 249	
10.6	Coagulation Disorder (Haemophilia), 278	
10.7	Haemoglobinopathy, Sickle Cell Disorder, Thalassemia, 283	
10.8	Autoimmune Haemolytic Anemia (AIHA), Paroxysmal cold haemoglobinuria, Paroxysmal Nocturnal Haemoglobinuria, Drug Induced Haemolytic Anemia, 294	
10.9	Haemolytic Disease of Newborn, 304	
11.	Blood Component Separation, and Use	322–356
11.1	Blood Component Separation, 322	
11.2	Apheresis, 339	
11.3	Plasma and Plasma Substitute, 346	
11.4	Blood Substitute, 353	
12.	Quality Control	357–369
12.1	Introduction, 357	
12.2	Quality Control of Reagents, 358	
12.3	Blood and Blood Component, 363	
12.4	Technique, Office Procedure (Record, Medical Audit), 365	
12.5	Equipment, 367	
13.	Guidelines on Biosafety	370–380
	Historical review, Personal Care and Hygiene, Handling Transfer and Shipment, Protective Barrier, Decimation or Inactivation of Virus Bacteria, Sterilisation and High Level Disinfection, Disposal of Wastes and Discard,	
14.	Common Blood Bank Reagent, Solution Buffer and Special Methods	381–424
14.1	Solution, 381	
14.2	Buffers, 383	
14.3	Commonly used Reagent in Blood Bank, 385	
14.4	Techniques in Blood Banking, 395	
15.	Mathematical Consideration	425–459
15.1	Introduction, 425	
15.2	Solutions, 426	
15.3	Base Units, 427	
15.4	Numbers, Operation of Numbers, Logarithm and its Application, 427	
15.5	Statistics, 435	
16.	Computerisation and Automation in Blood Bank	460–467
17.	Medicolegal Aspect	468–470

x| Contents

Appendices	471–500
<i>Appendix 1</i> : Drug and Cosmetics Rule 1945 with 1989 Amendment, : National Blood Policy	471
<i>Appendix 2</i> : Label for Blood Samples,	484
<i>Appendix 3</i> : Sanction Slip,	485
<i>Appendix 4</i> : Blood Receipt,	486
<i>Appendix 5</i> : Blood Requisition Form,	487
<i>Appendix 6</i> : Blood Grouping Form,	489
Append 6A : Cell Typing	
Append 6B : Serum Typing	
<i>Appendix 7</i> : Voluntary Donation Card,	490
<i>Appendix 8</i> : Replacement Donor Card,	491
<i>Appendix 9</i> : Donor Form,	492
<i>Appendix 10</i> : Transfusion Reaction Work Up Form,	493
<i>Appendix 11</i> : Transfusion Reaction Report Form,	494
<i>Appendix 12</i> : Blood Donor Record Form,	496
<i>Appendix 13</i> : Processing and Disposal of Blood Form,	497
<i>Appendix 14</i> : Recipient Sample/Specimen Report Register,	498
<i>Appendix 15</i> : Daily Blood Issue Register,	499
<i>Appendix 16</i> : Patient Blood Group and Coomb's Test Report Register,	500
Index	501–508
